ELEVENTH ANNUAL CATALOGUE.

A. G. ANDERSON,
SEEDSMAN AND FLORIST,
LEIGH, NEBR.

SELECT SEEDS.

AGAIN!

THE pleasure of addressing my numerous customers once more devolves upon me, and I wish first of all to thank them for their kind words and patronage, which has been so generously bestowed in the past, and it shall be my earnest endeavor to please them and merit a continuance of their esteemed favors. My catalogue is not so elaborate and showy as some you may receive, but if you will compare prices you will undoubtedly find the balance in favor of my modest effort. It is a well known fact that firms who send out expensive catalogues must make the prices correspondingly higher in order to derive profit on their goods. If you have not already tried my seeds and plants, send me a trial order and let me demonstrate by results that good seeds and plants can be sold at low prices.

Quality of Seeds.—I guarantee my seeds to be the best that can be produced, and far superior to job lots and old stock, which are often palmed off on the public for good seed. Those which cannot be grown successfully here are procured only from the most responsible growers. Unlike most seedsmen, I will not buy of anyone for the sake of buying cheap.

I Warrant my Vegetable Seeds to be fresh, pure and reliable in every respect, and agree to replace any that may fail to grow, if the customer has good cause to think the fault lay with the seed, but I will in no way be responsible for the crop, or liable beyond the amount paid for the seed. All seeds are tested, and under ordinary circumstances will be sure to grow. Do not buy old shop worn seeds, when you can get fresh and reliable seeds at lower prices.

My Flower Seeds are sold under no guarantee whatever, for the reason that many people do not give the care required to germinate many kinds of flower seeds; but I sell them with the honest assurance that they are fresh and pure, and equal to any obtainable in every respect. I have placed the prices of my flower seeds so low that the cost of seed is no excuse for not having a flower garden. These low prices are only made possible by importing and growing them in large quantities, confident of a liberal patronage from my customers.

Sign your Name, give Post Office, County and State every time you write.

How to Send Money.—When Money Orders and Postal Notes, or Express Money Orders are obtainable do not send stamps, as I cannot use them except for paying postage, and if everyone persists in sending stamps I am at a loss what to do with them. Drafts on Chicago and New York are acceptable; but private checks will be returned.

CLUB TERMS.

Although sold on a close margin, in order to induce my customers to make their orders as large as possible or get their neighbors to club with them, I will allow the following extraordinary large discount.

Plants at single rate, and Flower and Vegetable Seeds in packets may be ordered on these terms:—

For 50 cents Select to Amount of 60 cents.

For \$1.00 Select to Amount of \$1.25.

Collections of seeds or plants, and seeds by the ounce, pound, pint or quart must not be counted to secure club rates. All articles enumerated in this catalogue are sent by mail postpaid at prices given, and safe arrival guaranteed.

WONDER COLLECTIONS.

These collections cannot be counted to secure club rates but are strictly nett.

No. 1.—6 Pkts. Vegetable Seeds, a choice selection of standard and new varieties. 12c.

No. 2.—10 Pkts. Choice Flower Seeds, Annual and Perennial varieties. 15c.

No. 3.—5 Pkts. Aster, Carnation, Double Petunia, Pansy and Verbena. 15c.

No. 4.—6 Beautiful House Plants. A charming collection of fine plants. 30c.

No. 5.—6 Fine Bedding Plants. 30c.

No. 6.—6 Charming Chrysanthemums. 30c.

No. 7.—7 Coleus, not labeled. 30c.

No. 8.—5 Excellent Fuchsias. 30c.

No. 9.—5 Geraniums, fine varieties. 30c.

No. 10.—7 Verbenas, not labeled. 30c.

No. 11.—6 Begonias. 30c.

No. 12.—5 Fine Cannas. 30c.

No. 13.—1 Palm, 1 Rose, 1 Pelargonium, 1 Geranium and 1 Begonia. 30c.

No. 14.—6 Beautiful Roses. 30c.

SURPRISE COLLECTIONS.

At the end of every season I have a quantity of some plants unsold, these I will offer to my customers in collections at just one-half of catalogue prices, the selection of kinds and varieties being left entirely to me. These collections will not be sent out till after May 15th. Send any amount above 25 cents and I will mail you a selection.

Address all orders plainly to

A. C. ANDERSON,

LEIGH, COLFAX Co., NEBRASKA.

PLANTS.

It is with pleasure I present this list of Choice Plants to my customers, knowing I place it within the means of everyone to get a fine assortment. Although sold at comparatively low prices, my plants are in no way inferior to those of other florists, and in one respect are superior to many, they being grown in cool greenhouses, so they are not unnecessarily forced, and thus stronger than those propagated in the excessive heat kept in many houses. All plants are sent by mail, postpaid, and I guarantee them to reach their destination safely, and in good condition. Please remember I do not guarantee the plants to live, if they are received in good condition my responsibility ceases, and all claims must be made within five days of receipt of plants. Plant orders under 25 cents will not be filled. Read club terms before making out your order.

ABUTILON.

A very profuse blooming plant, with maple-like foliage and beautiful bell-shaped flowers. Fine for winter bloom if plunged in pots outside during summer. Take the plants in before frost.

Snowstorm. The finest and most floriferous variety grown. A perfect beauty. 10c.

Thompsoni Plena. Flowers perfectly double; color rich deep orange, shaded and streaked with crimson; the foliage is beautifully mottled yellow and green. A charming variety. 10c.

Erecta. As the name indicates, the flowers of this variety are produced in a more upright position than other varieties. Color, a pleasing shade of rosy pink. A strong grower and free bloomer. 10c.

Golden Fleece. A beautiful variety with pure yellow flowers, produced in great abundance. 8c.

Firefly. Brilliant red, shaded crimson. Fine winter bloomer. 8c.

Souvenir de Bonn. This new variety has bright green leaves, distinctly edged with a broad pure white band. The flowers are of golden yellow color veined with scarlet. It is exceedingly floriferous. 20c.

ACHANIA MALVAVISCUS.

Sometimes called Crystal Maple. A very desirable flowering shrub from South America; introduced in 1780. Remarkable for the beauty of its intense scarlet flowers, and its green, heart-shaped leaves. It blooms continually throughout the year. A very desirable acquisition. 10c.

ACHRYANTHUS.

Fine foliage plants of easy culture for bedding in masses or ribbon style.

Formosa. Yellow and green foliage, and delicate pink stems. 7c.

Lindenii. Leaves very dark red. One of the best dark varieties. 8c.

ASCLEPIAS ALBA.

A genus of very attractive plants, both for pot culture and outdoor planting. Bears umbels of pure white flowers during the entire summer. 8c.

ANTHERICUM VARIEGATUM.

This is an elegant house plant; has dark green leaves, beautifully bordered with broad stripes of pure white; it throws up long spikes of small star-shaped flowers, which are very effective; fine for hanging baskets. 10c.

APIOS TUBEROSA.

A hardy tuberous-rooted climber, with clusters of deep purple flowers, which have a strong, violet fragrance. They bloom profusely. 8c.

AGATHEA CELESTIS. (Blue Daisy.)

Flowers blue, with a yellow disc. Blooms well during the winter, and it makes a novel appearance in a collection with its beautiful flowers. 7c.

"WHIRLWIND."

Novelties appear and claim the attention of the public, only to disappear again after a few years trial as worthless. In this new aspirant we have something that is sure to please and remain an acquisition. It is particularly desirable for cemetery planting, being perfectly hardy, and is a strong and free bloomer, producing its large semi-double, pure white flowers in great abundance. This beautiful plant deserves a place in every garden. 25c.

AGAVE VARIEGATA.

This is the finest variety of the popular Century Plant. Center of leaves green, with broad white stripes on the margin. This makes fine specimens. 20c.

ALOE.

This is a very ornamental plant with thick, fleshy, recurved leaves, the juice of which have healing properties when applied to cuts, burns or bruises. Coral-red flowers. 20c.

AGERATUM.

Beautiful summer and winter blooming plants; of easy culture, growing and blooming well in any soil or situation.

White Cap. A compact grower, bearing profusions of white flowers. 6c.

Variegata. Light green foliage, beautifully margined with silvery white. 7c.

ALYSSUM.

Little Giant. Elegant white flowers, borne erect like candytuft. Fine for pots or bedding, the plants are covered with bloom. 6c.

AMARYLLIS.

Splendid flowering bulbs for house or garden culture. Allow them to rest after flowering, keeping them dry during winter, except *Equestre*, which is a winter bloomer and should be bedded out during summer.

Formosissima. Flowers very large, petals broad and very firm, intense velvety crimson, the shape and color of the flowers are most striking. 10c.

Johnsoni. Flowers scarlet, striped with white; very large; a fine plant. 40c.

Rosea. Beautiful clear rose; flowers large and very handsome. One of the oldest and best; blooms all summer, and is greatly admired. 7c.

Candada. Pure white, and the freest bloomer of all, though not so large. It is also the oldest and best known sort. 7c.

Treatie. This is, in all respects, much like *Rosea*, except its color, which is pure white. Flowers large and very beautiful. 7c.

Equestre. This *Amaryllis* is one of the most beautiful, as well as one of the most easily grown. It stands pre-eminently the first among this class

of plants as a winter bloomer, commencing to bloom shortly after the bulbs are planted. It produces large flowers of exquisite beauty, being a rich sparkling orange-red, shading to a beautiful green, and terminating with a white star in the center. 15c.

BEGONIA.

There is no class of plants that present so many different forms as the Begonia, indeed, they give an almost endless variety of unique shapes in the formation of their leaves. They delight in a warm, moist, shady situation. Give them rich soil, but avoid direct application of manure. Leaf mould and sand is a good soil for begonias.

Argentea Guttata. This beautiful variety has purple bronze leaves, oblong in shape, with silvery markings, and is in every way a most beautiful Begonia. It produces white flowers in bunches on ends of stems. It is splendid for house culture. 10c.

Argyrostigma Picta. A handsome compact variety, leaves silvery green, dotted white; smooth and glossy. Flowers lemon white. 8c.

Bertha de Chateaurocher. This is one of the most charming, producing its beautiful currant-red flowers in profusion. Easily grown and fine for cut flowers. 6c.

Bruanti. This is an exquisite shrubby variety, with very bright green foliage and delightful waxy white flowers, slightly tinged with delicate pink. Always in bloom. 7c.

Clementina. A cross between Rex and Diadema; the color of the stem and the upper surface of the leaf is a beautiful bronze green, ornamented with large silver spots, arranged parallel with the ribs of the leaf. It is a rapid grower; easily managed. 15c.

Dr. Nachtigal. Flowers a tender rose color, and odorous; the only fragrant Begonia that we know. Large deep green leaves, vigorous and free-flowering. 12c.

M. de Lesseps. Large leaves, of a rich silky texture, beautifully spotted with silver. This is a wonderfully beautiful sort, of splendid habit and strong growth. 15c.

Margaritæ. It grows in round bushy form; leaves bronze green, with purplish cast. Very free-flowering, bearing large trusses of delicate cream and rosy flowers. 7c.

Metallica. Foliage of velvety metallic color, darkly veined; beautiful mossy pink buds and flowers. One of the most desirable varieties grown. 15c.

Moonlight. A dwarf bushy variety, flowers creamy white and borne in great profusion. It has a rich fern-like foliage of a beautiful light green. 7c.

Paul Bruant. Makes fine specimen plants; has large, heavy leaves of deep olive green, and produces rich flowers of a delicate rose color, changing to white. 15c.

Rubra. Without exception, the most popular Begonia grown. Foliage large, glossy dark green, flowers waxy scarlet, borne in immense trusses. 15c.

Rubella. A very ornamental Indian species, belonging to the *Recinifolia* section. Leaves irregular, blotched red on a pallid ground, ribs banded with purplish brown, under surface red. This is a wonderfully attractive variety. 12c.

Saundersoni. This attractive variety is known as the Coral Begonia on account of the rich coloring of its flowers, which are of a scarlet shade of crimson. The flowers are borne in profusion for months at a time. Leaves slightly edged with scarlet. 7c.

Sanguinea. Leaves darkest glossy green or olive, underside dark crimson; flowers white. Makes a charming combination that is sure to please. 10c.

Speculata. Quite a novelty in the Rex type, with grape-like leaves of bright green, with a background of chocolate; has pea-green veins, and is spotted with silver. In bloom it is magnificent, the large pink flowers stand high above the foliage. 15c.

Thurstoni. This has bright red foliage and veinings under the leaves, while a clear metallic green, shading to red, is conspicuous in the younger growth. The flowers are a beautiful shell pink. It makes a grand pot plant, and is fine for bedding. 12c.

Weltoniensis. This is very popular, and one not likely to be soon displaced by the new varieties. Flowers a rich shade of pink, stems red. A profuse bloomer. 7c.

Zebrina. A pretty ornamental species from Brazil. Leaves satiny green with a silvery tinge along the midrib. Bears large panicles of white flowers. 8c.

REX BEGONIAS.

The rare beauty of these ornamental foliage plants is truly charming. They present such wonderful variegations of such intense richness of coloring, that they merit a comparison with the rainbows brilliant hues. Give a shady, moist situation.

Lesoudsii. This is the largest leaved of any in the Rex family and is a superb combination of bronze, green and silver. 10c.

Queen of Hanover. Leaf of soft velvety texture, covered with red pile, center and edge of soft green velvet, the zone is formed by small silver dots. 15c.

Queen Victoria. Solid silver leaf of crepe-like texture, reddish veins, embroidered

BEGONIA—THURSTONI.

4 margin and fluted reddish edge. 15c.

Unnamed Varieties. These are some of the finest grown. 8c. each; 3 for 20c.

BRUGMANSIA ARBOREA.

This beautiful plant grows in a fine, minnature tree form, and completely loads itself with pure white, drooping, bell-shaped flowers a foot long, six or eight inches wide, and of the most overpowering sweetness. Over 200 flowers have been counted on a plant at one time, and they almost completely obscured the leaves and weighed the branches to the ground. May be kept as a pot shrub the year round, or be bedded out in the spring and wintered in a pit or cellar, or kept up for winter blooming. 12c.

BRYOPHYLLUM

A curious plant with thick succulent leaves, which, when placed on moist earth will throw up numerous plants along the edge. It produces large and interesting panicles of flowers, and is withal a most unique curiosity. 8c.

CURIOUS CACTI.

The Queen Cactus.

The flowers of this beautiful Cactus is most exquisite, the long, trumpet shaped buds expanding after sunset into a large rosette of delicate white petals, shaded outside in golden tints. The delicious odor is most powerful, adding another agreeable feature to its many qualities. It likes a rich soil, plenty of water while growing, and a slightly shaded place during the hot summer months; in winter just sufficient water to keep it from shriveling up. Flowers six inches across. 20c.

The King Cactus.

(Phyllocactus Ackermani.) A fitting companion to the above. The enormous flowers are of a bright deep scarlet, so rich and beautiful that it is impossible to describe it. 25c.

QUEEN CACTUS.

KING CACTUS.

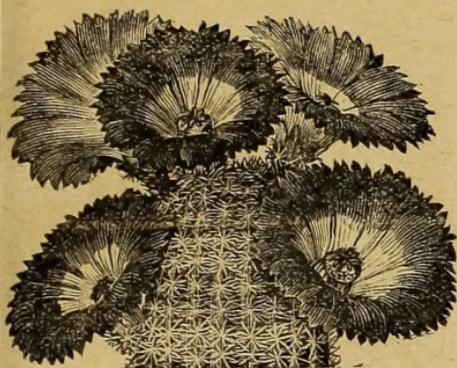

Candle Cactus. Words cannot describe the beauty of this plant. It grows two to four feet high, branching like a tree, and producing hundreds of golden-yellow, sweet-scented flowers, large and double like enormous roses. The stems are covered with a net work of shining spines, which reflect a luminous ray of light that can be seen a long distance, hence its name—Candle. 20c.

Lobster Cactus. This is a fine drooping species composed of short joints, which resembles a lobster's claw somewhat in shape. A well grown specimen will produce numerous bright crimson flowers, hanging pendent from the branches. 15c.

Rainbow Cactus. The plant is covered with spines of various colors, and flowers four inches across, bright crimson with white center. It blooms profusely and is of the easiest culture in pots. One of the finest varieties in cultivation. 30c.

Living Rock Cactus. Looking at this curiosity, no one would think it was a plant. It is wholly destitute of spines, and its fissured surface, with pearl gray tubercles, looks like a finely carved stone. It bears a delicate, rose colored flower. 40c.

Echinopsis Mulleri. A most valuable new Echinopsis, not only on account of its rapid growth, and because it blooms when only two years, but especially because its flowers, which are double and of a satiny rose color. Will remain open for fully a week, and are of the most delicate odor. 20c.

RAINBOW CACTUS.

LIVING ROCK CACTUS.

CRINUM AMERICANUM.

This is one of the most profuse blooming of the Crinums, producing its beautiful, large pure white fragrant flowers in immense umbels, on tall, erect growing scapes, several times during the year. Unlike some species, this should not be dried off during the winter, it being an evergreen, but should be kept in pots and watered only enough to keep the foliage from wilting. It can be stored in a cellar, and will winter with very little care. It flourishes magnificently as a pot plant, and is admirably adapted for out door culture during summer. 15c.

CESTRUM PARQUI. (NIGHT-BLOOMING-JASMINE.)

This well known and highly prized plant is a native of Chili. An excellent garden plant, growing rapidly. Produces its richly fragrant flowers at every joint, which is sweet only at night. It is also well adapted for house and window culture. 8c.

CHINESE MATRIMONY VINE.

A most vigorous hardy climbing plant when trained to an arbor, fastened to a fence, attached to a tree, to the side of a house, the pillars of a piazza or in any location where a hardy vigorous climber is desired. It sends out numerous side branches, so that it covers a great amount of space in a short time, and every new growth is at once covered with bright purple flowers which are succeeded by brilliant scarlet berries nearly an inch long, every branch being loaded with them; the contrast between the glossy, dark green foliage and shining scarlet fruit is extremely beautiful, surpassing "Holly" in appearance. It continues flowering and new berries are forming from late spring until frost. The berries ripen in early autumn and remain on the vine late into winter. The number of hardy vines which can be grown without danger from frost in our Northern States is limited, and none are more beautiful than this or as easy of culture. It will grow and thrive in any situation, either shade or bright sunlight, and will take root in any soil; in fact, nature has given it all the essentials for wide popularity. 10c.

THE TRICOLOR CUPHEA. (Cuphea Llaveae.)

A new remarkable flowering plant, combining as it does three distinct colors in each flower, scarlet purple and white. It belongs to the same family as the well known "Lady's Cigar Plant," but is vastly superior in every way. The flowers are tubular in shape, about two inches long, and have two bright scarlet wings at the end of each flower; the tip of the flower is bright purple, the stamens are pure white; the body is pea-green and is covered with fine crimson hairs like a moss rose. The plants are always in bloom when given proper care. It grows fifteen inches high, making an elegant appearance when potted or in the open ground. 8c.

COOPERIA PEDUNCULATA.

This is the beautiful Evening Star Flower. Fine for winter flowering in the house,

6 or may be kept dry and planted out in the garden in the spring, where a clump them planted close together will bloom successively from May to September. The flowers are white, star-shaped, with long tubes; delicious primrose fragrance. 8c.

CARNATION.

This is one of the sweetest plants grown, and are among our best winter bloomers. Grow in the open ground, pinch back all buds that may appear up to the middle of August, and pot in the latter part of September.

Fred Creighton. Greatly admired for its rich color, being a beautiful, delicate shade of pink. Flowers freely produced. Plant of strong and vigorous growth. 8c.

Golden Gate. A beautiful new golden-yellow Carnation, with not a particle of stripe or foreign color; full and double, and a free, vigorous and healthy grower. 8c.

L. L. Lamborn. Flowers very large and of the purest white. Dwarf habit. 7c.

Silver Spray. Flowers large, long stemmed, and freely produced. Color pure white. 8c.

Portia. The most intense bright scarlet; vigorous habit, and fine flowers. 7c.

Starlight. A beautiful cream colored variety, of fine form and habit. 7c.

CALLA LILY.

An old favorite plant, which should be found in every collection; it grows freely and requires abundance of water, and produces large pure white flowers during the winter and spring. The resting period during June and July can be given by turning the pots on their sides, withholding water entirely. 7c.

CANNA.

Plants of very majestic appearance, and of much beauty in both foliage and flowers. They thrive best in a sunny situation, want rich soil and plenty of water.

Antoine Crozy. Rich deep green foliage; a strong, vigorous grower and free bloomer; flowers of a bright cherry carmine; very effective. 12c.

Alphons. One of the finest dark foliage varieties, with rich scarlet flowers. 12c.

Brilliantissima. Handsome dark metallic bronze leaves; of very majestic appearance, contrasting splendidly when planted with the green varieties. 8c.

Doyen Sisley. Of dwarf, elegant growth, dark foliage and crimson flowers. 10c.

Ehemanni. The most distinct of all Cannas on account of its large oval soft green leaves and carmine-red flowers on long stems, as large as a gladiolus. 8c.

Emile Le Claire. Flowers large, bright golden-yellow, mottled and spotted crimson and scarlet. Very useful for cut flowers, the peculiar color being very attractive. 8c.

Madame Crozy. Flowers glowing scarlet, as large as a gladiolus and borne in immense spikes. Dwarf grower, green foliage, and one of the most abundant bloomers. 15c.

Madame de Hours. One of the most attractive; dark foliage and scarlet flowers. 8c.

Noutoni. Large crimson scarlet flowers, and beautiful bluish green foliage. 8c.

Robusta. Grows to immense size, with broad and long bronze colored leaves. 8c.

Souvenir de Asa Gray. One of the finest dwarf varieties, large red flowers, 8c.

Ventura. A magnificent dwarf sort, with large conspicuous crimson flowers. 10c.

CHRYSANTHEMUMS.

Ada Spaulding. Of sturdy, robust habit. Color novel and distinct. Light pink, shading in the upper portion to the purest pearl white. Petals large and solid. 8c.

Cullingfordii. Reflexed, brilliant velvety crimson, free bloomer. 6c.

Dr. A. B. Leonard. One of the richest of Chrysanthemums, being an intense bronze crimson, petals much twisted, when open has the appearance of velvet. 7c.

Golden Wave. Bright lemon-yellow, without shadings, incurving, large and round. Of finest form and habit. 7c.

Hero. This is without doubt the finest crimson variety ever brought out, the deep color is so intense as to be almost glistening. Flowers very large and attractive. 20c.

Harry Balsey. Soft mermet pink; one of the finest for exhibition. 8c.

Louis Boehmer. An exquisite shade of silvery pink. The petals have the peculiar downy appearance of an ostrich feather. 10c.

M. B. Spaulding. A grand, clear, deep yellow; immense in size, petals incurving and interlacing, center full and high without an eye; a grand show variety. 8c.

Mrs. A. Blanc. Very fine rosy lilac; good for pots, cutting, or exhibitions. Robust grower and free bloomer. 7c.

CHRYSANTHEMUM—WARRIOR

CHRYSANTHEMUM—MRS. J. LEWIS CHILDS.

to pure white. Flowers of largest size, borne on vigorous stems. 10c.

CHINESE VARIETIES.

Lady St. Clair. Flowers pure white, most regular and perfect incurved petals. 7c.

Lady Slade. Beautiful soft pink, shading to rich lilac. A grand incurved variety. 7c.

POMPONE OR SMALL-FLOWERING VARIETIES.

Cite of Flowers. Velvety crimson, shaded amaranth. An exquisite variety. 7c.

La France. The finest small-flowering, white Chrysanthemum grown. 7c.

Pink Perfection. A very floriferous variety, of a delightful pink shade. 7c.

COLEUS.

Nothing can excel the Coleus where ornamental foliage is wanted for bedding or pot culture, they present so many variegations in pleasing and fantastic shades. 5c.

CRASSULA CORDATA.

Succulent plants with fleshy stems and leaves, of strong growth, with a profusion of pinkish white flowers throughout the season. Fine for rockeries. 7c.

CYPERUS ALTERNIFOLI'S.

An ornamental grass, throwing up stems about two feet high, surmounted at the top by a whorl of leaves diverging horizontally, giving it a very curious appearance; splendid for the center of vases or as a water plant. 2c.

CHRYSANTHEMUM—MRS. ALPHEUS HARDY.

Mrs. Alpheus Hardy. The 7 peculiarity of this beautiful variety is the downey appearance of the petals, which produces a fluffy effect similar to that of an ostrich feather. Color, pure snow-white; of vigorous habit. 12c.

Mrs. J. Lewis Childs. Enormous flowers of the incurved type, nearly as round as a ball, and as white as snow. Blooms about Christmas; fine for decorations. 10c.

Queen. A grand double white, of fine size and great substance. Rounded in form, incurving and full. 8c.

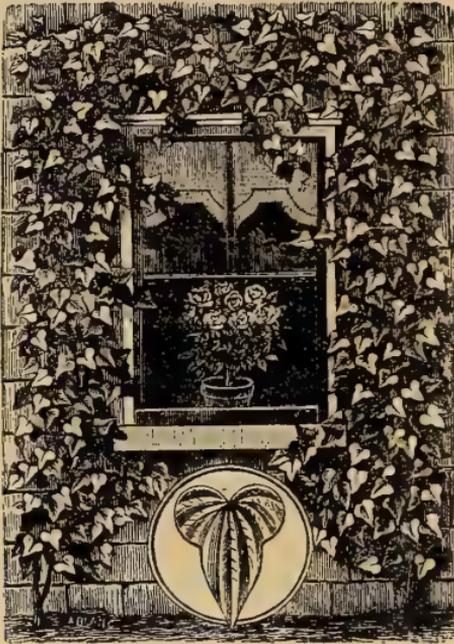

Robert Bottomly. A grand, large pure white variety. One of the very best. 8c.

Snowball. This is beyond a doubt the finest white variety brought out for years; the grand ball-like flower is so rich in purity of color, and so perfectly double, never having a tendency to show a naked center. It cannot be surpassed for cut flowers. 8c.

Silver Beauty. One of the finest white varieties, petals tubular, full globular form. 7c.

Warrior. Inside of petals deep crimson, outside brilliant bronze. Nothing can compare with this in richness of color and perfect form. 7c.

Wm. Falconer. A magnificent ostrich plume variety. Color a delicate flesh pink, changing

CINNAMON VINE.

CINNAMON VINE.

A beautiful climber, which possesses the rare quality of emitting from its flowers the delightful odor of cinnamon, and is very appropriately called the "Cinnamon Vine." Perfectly hardy, the stem dying down every autumn, but growing again so rapidly in the spring as to completely cover any trellis or arbor very early in the season. It is as easily cultivated as the Maderia Vine, has no insect enemies, and is not effected by drought. It has beautiful heart-shaped leaves, making a bright green, peculiar foliage, and clusters of delicate, odorous white flowers. 10c.

DAHLIA.

Of this desirable class of old garden favorites, I grow a number of choice varieties, including all colors. I can furnish them usually as dry roots, or as young plants started in pots. When selection of varieties is left to me, customers may depend on getting a good variety of colors. Named varieties. 15c. Unnamed varieties. 10c.

FABIANA IMBRICATA.

Delicate foliage, resembling a miniature cedar, densely covered in early spring with pure white tubular flowers. 10c.

FERNS.

Adiantum Pubescens. This is a beautiful variety of the popular and elegant Maiden Hair Fern; very rich and graceful in baskets, ebony stems and airy fronds. 15c.

Nephrolepis Exaltata. The beautiful Sword Fern. Grows freely in baskets of damp moss and soil. Well grown specimens attain a length of five or more feet. 15c.

Pteris Tremula. Popularly called The Shaking Fern. It grows rapidly, producing large fronds, and makes magnificent specimens in a short time. 15c.

DOUBLE WHITE FEVERFEW.

This is fine for cut flowers, furnishing an abundance of charming little flowers. 7c.

FUCHSIA.

Few plants can compare with the Fuchsia in graceful form and delicate coloring of the flowers. They are superb bloomers in summer and occasionally display their rare beauty during winter.

SINGLE VARIETIES.

Black Prince. Tube and sepals bright waxy carmine, sepals tipped with green; corolla bell-shaped, reddish rose. A variety that is generally successfully grown. 7c.

Lovely. A grand and conspicuous variety of recent introduction. Tube and sepals white, corolla brilliant crimson, tinted magenta. 8c.

Lustre. Waxy white tube and sepals, elegantly reflexed; corolla fine coral red. 7c.

M. Jule. This is a wonderful new Fuchsia. It is the most prolific bloomer that have come to our notice, over a thousand buds and flowers having been counted on

FERN—NEPHROLEPIS EXALTATA.

a single plant at one time. The flower is distinct from that of other varieties. The tube and sepals are of a rich crimson color and elegantly reflexed; the corolla is semi-double and of a beautiful lilac color. Fine for specimen plants. 15c.

Mon. Thibaut. This grows to a perfect pyramid, with large handsome foliage of a delightful green tint, the foliage alone making it worthy of cultivation. The flowers are unusually large, sepals dark red, corolla vermilion, tinted violet. 10c.

Speciosa. Pale red tube and sepals; dark red corolla. Best winter bloomer. 8c.

Trailing Queen. This is a grand new variety, of neat, trailing habit. The flowers are borne in large, drooping clusters, and are very large, long and graceful; buds, tubes and sepals being bright rosy scarlet, the corolla is a deep, rich violet-purple. This charming plant is one of the freest bloomers known. 8c.

DOUBLE FUCHSIAS.

Admeral Courbet. Sepals bright red; corolla deep violet. Enormous double flowers. 8c.

Bridal Veil. A fine new double white variety. Tube and sepals are a bright, rich reddish crimson color; corolla extra large, pure white, full and double; large size. 8c.

Elm City. Sepals rich crimson; corolla violet-purple. A fine variety. 7c.

Fantasia. This new variety is one of the most brilliant of the dark colored varieties. The sepals are of a deep glistening crimson, beautifully reflexed; the corolla is very large, and of a deep violet color, contrasting magnificently with the sepals. 10c.

Phenomenal. This is beyond a doubt the largest Fuchsia grown. The tube and sepals are bright coral-red, beautifully formed. The

NEW FUCHSIA—THE WHITE HOUSE.

corolla, nearly two and one-half inches across, is of the richest violet shade. The habit is remarkably free and it blooms more freely than any large variety we have seen. 12c.

The White House. This is beyond a doubt the Fuchsia that will reign queen of that beautiful class of plants. It is the finest, largest and most satisfactory of all double white Fuchsias that we have seen. The corolla is pearly white, very large and double; sepals a dazzling scarlet, and finely reflexed. Our illustration conveys a good idea of this magnificent variety. 12c.

FARFUGIUM GRANDE.

This beautiful plant is commonly called the "Leopard Plant." It has large round leaves, of dark glossy green, with numerous cream colored spots and blotches. 15c.

GASTERIA.

A curious succulent with thick, fleshy, tongue-shaped leaves, which is spotted with white, in raised lump. Flowers on graceful spikes, blooming in winter. 20c.

GLECHOMA HED. VARIEGATA.

A variegated form of the common ground ivy, which is prettily marked with pure white on a bright green ground. It is very fine for baskets. 7c.

GERANIUMS.

Everybody knows these universally grown plants, which is without doubt the most desirable for all purposes, of the easiest culture, requiring less care and attention than most other plants.

DOUBLE VARIETIES.

Bishop Vincent. The handsome flowers are bright cherry, mixed with solferino in a most charming manner, the flowers are of large size and are on magnificent, large, massive trusses, very profuse bloomer. Stands the hottest sun without scorching. 8c.

Contraste. Rich combinations of orange and carmine; dwarf, compact habit. 7c.

Emile de Girardin. Of a deep soft rose, rather than pink, but fresh and bright, the blossoms are perfect in form and borne well and clear above the foliage. 8c.

Faidherbe. A fine sort; very thick and double; flowers of a dark soft red, tinted with scarlet and heavily shaded with maroon; very dark and rich, yet very bright. 8c.

Glorie de France. One of the most beautiful parti-colored geraniums. Flowers carmine and white, carmine center, each petal delicately edged with carmine. 8c.

Henry Campbell. Intense deep scarlet; very large flower; trusses of good shape, and very freely produced; habit of plant short-jointed and compact. 8c.

James Vick. Flowers and trusses of great size; color deep flesh, with dark shadings. 8c.

La Favorite. This is beyond a doubt the finest double white Geranium ever brought out. Very free flowering, of dwarf and compact habit; flowers pure white. 8c.

Le Pilote. Bright crimson-scarlet, shaded violet; dwarf and compact. 7c.

M. Caro. The first real approach to lilac yet attained in geraniums. The double flowers are a delicate shade of light lilac, edge changing to rose. 7c.

Maiden's Blush. A rich lavender pink; large trusses, and very free blooming. 8c.

Marvel. Rich maroon, shaded with orange; petals beautifully incurved. 8c.

IO Peach Blossom. Center beautiful carmine, shading to delicate blush white. 7c.
Peter Henderson. Bright orange scarlet, base of petals pure white; very fine. 7c.
Remarkable. Flowers deep, rich crimson, finely shaded; trusses very large. 6c.
White Swan. This is the most floriferous double white Geranium ever introduced; it will astonish all who grow it—103 trusses and buds having been counted upon a single exhibition plant. It is unsurpassed for cut flowers; snow-white flowers. 8c.

SINGLE VARIETIES.

Apple Blossom. A beautiful variety with a delicate lilac shade, tinged pink. 6c.
Arc-en-Ceil. Reddish lake, tinted fiery red; upper petals marked orange. 8c.

Brightness. In this variety we have a Geranium of the brightest dazzling scarlet. 8c.

G. W. Earl. A beautiful white variety, with a distinct rose center. Grand and showy. 8c.

Mary Hallock Foote. Immense trusses of bright pale salmon flowers. Large and fine 7c.

Marguerite de Layres. Flowers are pure white; a grand bloomer; fine habit. 8c.

Souvenir de Mirande. This grand variety has beautiful round forets, upper petals cream white with a distinct rosy pink border; lower petals salmon rose, streaked with pure white. This grand variety should adorn every window and garden. 8c.

FANCY LEAVED GERANIUMS.

Cloth of Gold. Center of leaf dark green, margined with a broad band of yellow. 8c.

Gen. R. E. Lee. Leaves deep green, distinctly marked with a large, light golden blotch in the center, forming a well marked variegation. Flowers dazzling scarlet. 8c.

Happy Thought. Center of leaf creamy yellow, with outer band of dark green. 10c.

Madam Salleroi. Leaves deep olive green, with broad margin of pure white. 7c.

Magician. Foliage dark green, with greenish yellow disc, and delicate chocolate zone. Double orange scarlet flowers. A very fine bloomer. 8c.

Mrs. Pollock. A magnificent variety, the green leaf disc is overlaid by a beautiful bronze-red zone, belted with bright crimson, and outwardly margined with golden yellow; very fine for the parlor and conservatory during the winter and spring. 15c.

Mountain of Snow. Green leaves, with margin of pure white, flowers scarlet. 8c.

IVY-LEAVED GERANIUMS.

The graceful trailing habit of these popular plants, makes them much sought after for window gardening, hanging baskets, and bedding out during summer.
Glorie de Orleans. One of the most profuse bloomers; deep rose color. 8c.
Horace de Choiseul. Large, rich glowing salmon-pink; a very fine variety. 8c.
Jean de Arc. Flowers large, double and of fine form; color pure white; very grand. 10c.
M. Dubus. Flowers of perfect shape, and of a rich glistening rose color. 7c.
Spalding's Pet. Of erect and compact growth; profuse in bloom; cerise-red. 7c.

SCENTED GERANIUMS.

This class of geraniums is grown exclusively for the fragrance of their foliage, which is indispensable in bouquet making.
Apple. Round, light green leaf, delightfully fragrant. 15c.
Mrs. Taylor. A distinct variety with deep scarlet flowers, resembling those of a pelargonium; a fine bloomer, and unequalled as a pot plant or for bedding. 15c.
Nutmeg. One of the most fragrant, and very easily grown. 7c.
Pine Apple. This has the delightful fragrance of the pine apple. A robust grower. 7c.
Rose. The most fragrant of all, and a universal favorite. 7c.

Among our summer bloomers this is one of the best, being grand in both flowers and foliage, indeed, anything prettier than their rosette of velvety green leaves and lovely trumpet-shaped flowers can scarcely be conceived. Start bulbs in some warm place, grow in partial shade and dry off when done blooming. 15c.

GLADIOLUS.

The queen of summer bedders, displaying the grandest blending of colors and contrasting shades imaginable. Store bulbs in some frost-proof place over winter. 7c.

Angele. Large, showy white flowers. 8c. **Archimedes.** Light red. 8c. **Bowiensis.** Crimson-scarlet. 8c. **Brenchleyensis.** Vermillion-scarlet. 6c. **Ceres.** Pure white, spotted with purplish rose. 6c. **Madame Monneret.** Delicate rose. 6c. **Napoleon III.** Bright scarlet; white line in each petal. 6c. **Stella.** White, tinted yellow-rose, flamed carmine. 7c. **Fine Mixed Gladiolus.** 3c. each; 25c. per dozen. **Lemoine's Hybrid Gladiolus.** These are noted for their intense, vivid colors. Fine varieties mixed. 4c.; Doz. 35c.

HARBROTHAMNUS ELEGANS.

This plant is of very easy cultivation, and may be trained as a vine or as a tree. Flowers light carmine: a fine winter bloomer. 8c.

HELIOTROPE.

Indispensable for pot or bedding plants, admired for their fragrance and delicately tinted flowers. They require a sunny situation.

Albert Delaux. Foliage beautifully variegated green and yellow; flowers very large, bright lavender. A very charming variety. 8c.

Mrs. Burgess. Color fine dark violet; one of the best dark sorts. 7c.

Mrs. David Woods. A rich violet blue, with conspicuous white eye; a fragrant, early and constant bloomer. 7c.

White Lady. Strong, of free branching habit, and is very profuse in bloom. The flower is large, and nearly pure white. 7c.

HEMEROCALLIS.

Flava. A fine hardy perennial, producing in June a profusion of clear lemon-yellow, lily-like flowers in large clusters; flowers from four to five inches in length, and very sweet scented. Fine for planting on the lawn, as it is perfectly hardy, and will soon form a large clump. 20c.

Dumortieri. A new sort, of dwarf and compact growth, producing large lily-like blossoms of a bright orange color. It is a free bloomer, and when once established will produce hundreds of flowers every year. Perfectly hardy anywhere. 15c.

Duplex Grandiflora. A double variety, forms immense clumps, and produces numerous large flowers of a rich orange yellow, with lighter shades. Perfectly hardy. 10c.

HONEYSUCKLES.

Fuchsia-Flowered. A new perpetual-flowering, weeping Honeysuckle. Its flowers are long, and trumpet-shaped, beautiful coral-red, borne in large clusters, and drooping like a Fuchsia. It is a strong, rapid grower, with beautiful leaves and numerous branches which trail and droop in a charming, wavy manner. 12c.

Halliana. This is an exceedingly valuable hardy climber; flowers pure white, turning to pale yellow, with the fragrance of the Cape Jasmine. Very hardy and vigorous. 7c.

Golden-Leaved. A most beautiful variety, the leaves being variegated with golden-yellow and green, making it one of the finest of all ornamental foliage plants. It is a large and rapid grower, and will soon cover the side of a house. Fragrant yellow flowers. 10c.

HYACINTHUS CANDICANS.

This variety has a majestic appearance; it resembles the Yucca, though not quite so large and grand. It throws up a flower stem about four feet high, on which it bears from twenty to thirty pure white, fragrant, drooping, bell-shaped flowers; admirably adapted for growing in clumps, in borders, or on lawns. Keep bulbs from frost. 10c.

HOYA CARNOSA—WAX PLANT.

This charming plant has thick, fleshy leaves, growing moderately fast, and bearing umbels of beautiful flesh colored flowers, from which are exuded large drops of honey-like liquid. One of the best plants for house culture, as it stands the extremes of heat and cold better than most plants, and is not easily injured by neglect. 15c.

HYDRANGEA.

Hortensis. A well known and favorite old plant, producing large heads of bright flowers, which at first are white and then change to blue and pink. 12c.

Cynoclada. A valuable new variety, producing immense trusses of bright rose-colored flowers. The new growth of wood and flower stems are of a deep purple color, giving it a distinct and attractive appearance. 15c.

IVY.

German. Of rapid growth, beautiful green, glossy foliage, fine for house culture. 7c. **Kennilworth.** A very pretty drooping or creeping variety with small lilac flowers; indispensable for baskets, vases, etc. 7c.

English. The best for all purposes, as it never drops its leaves. Nearly hardy. 8c.

IPOMOEA.

Grandiflora. This is the celebrated Moonflower. It grows fifty feet in one season, its moonlike flowers being of the purest white, 15 inches in circumference. 8c.

12 **Learii.** This is the Blue Moonflower, a quick growing climber, with flowers about four inches across, of a rich velvet blue, with five purple rays.

LANTANA.

Exceedingly valuable for bedding, and fine for pot culture. Unnamed varieties. 8c.

LILIES.

Nothing can excel the Lily for majestic stateliness and exquisite beauty.

Auratum. Immense blooms, white petals, spotted with chocolate crimson, and have a bright golden band through the center of each. This is the grandest of lilies. 15c.

Candidum. This is a charming, early blooming, pure white Lily. 15c.

Concolor. A charming hardy little lily, with brilliant crimson flowers. 8c.

Coridion. Delightful star-shaped flowers of clear yellow. 8c.

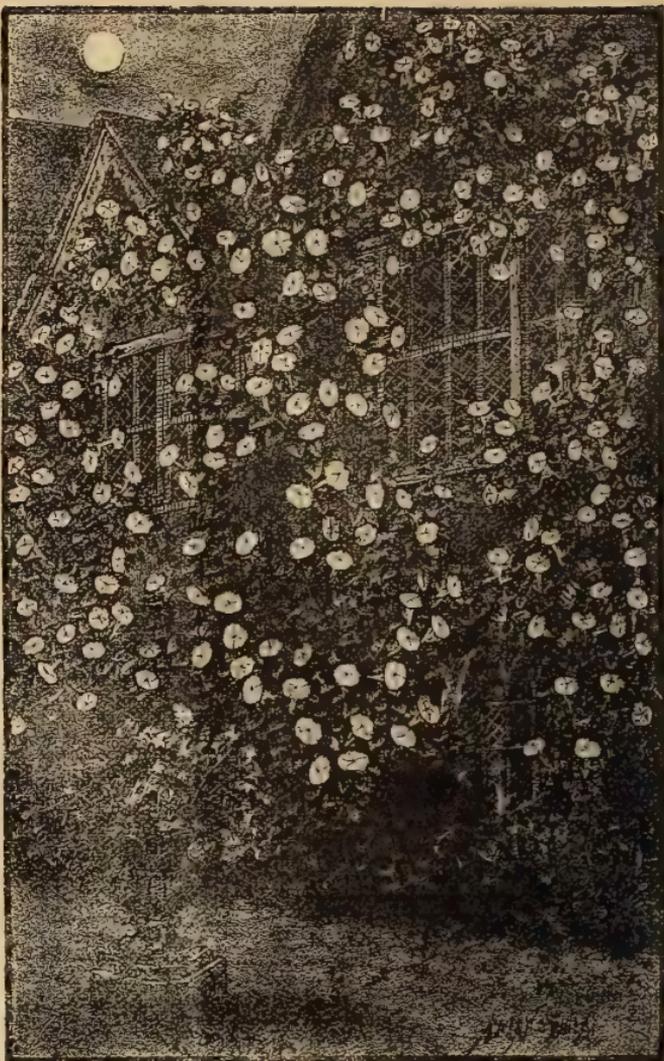

Elegans Aureum Maculatum. A fine sort, producing a number of elegant upright flowers of the most beautiful soft rose. It is one of the most pleasing sorts. 8c.

Pardalinum. Brilliant orange-red, spotted with black. 15c.

Speciosum Album. The purest white, and a very handsome flower. 20c.

Speciosum Roseum. White, shaded with deep rose and spotted with red. 20c.

Wallacei. Clear buff flowers, spotted with black; a very free flowering variety. 7c.

IPOMOEA—GRANDIFLORA, WHITE MOONFLOWER.

Some Lilies cannot be sent until spring, when they can be dugged from the ground.

LOPESIA ROSEA.

One of the most persistent winter blooming plants we grow; being literally covered with small, spider-like flowers, of a beautiful rose color. 8c.

MARGUERITE—PARIS DAISY.

This is very valuable for cut flowers; produces daisy-like flowers, a ray of white petals around a yellow disc. Fine for bedding or pot culture. 7c.

THE CHARMING MEXICAN PRIMROSE.

Beautiful saucer-shaped flowers of a charming pink, traced with darker lines, of neat airy appearance. A free bloomer, and of the easiest culture. 5c.

MANETTIA VINE.

A beautiful free growing vine with small-tubular shaped flowers of a rich, fiery scarlet color, shading to a bright yellow at tip of flower. It commences to bloom when very small. A valuable plant for trellises, vases or baskets. 10c.

MYRTLE.

A beautiful small evergreen shrub, the leaves of which emit a delightful odor. 15c.

A charming basket plant, with round fleshy leaves, and a profusion of bright yellow flowers. Fine for bedding, as it delights in our hot summer's sun. 7c.

OLEANDER.

These plants are well adapted for culture in pots and boxes, to be used in adorning the lawn or plant collection in the summer as they are easily managed to produce an abundance of bloom.

Semi-double White. This is the double white with others. Very large flowers. 15c.

SUMMER FLOWERING OXALIS.

Nothing is so valuable for edging the borders of walks or flower beds, as they bloom continually throughout the season, and make a fine border of green.

Dieppi. This is a beautiful pure white variety. 2c. Doz. 10c.

OTHAETITE ORANGE.

This is a beautiful dwarf orange, growing about four feet high and bearing a number of beautiful medium sized oranges which are very attractive. Its special merit, however, is in its free blooming qualities, it produces its flowers in great profusion, and when in full bloom, loaded with its fragrant white flowers, it is a sight worth beholding. 15c.

DOUBLE PETUNIA.

The Double Petunia is one of the finest bedding plants for massing, mixed borders or vases. The brilliancy and variety of its colors, combined with the duration of its blooming period renders it particularly valuable for garden decorations.

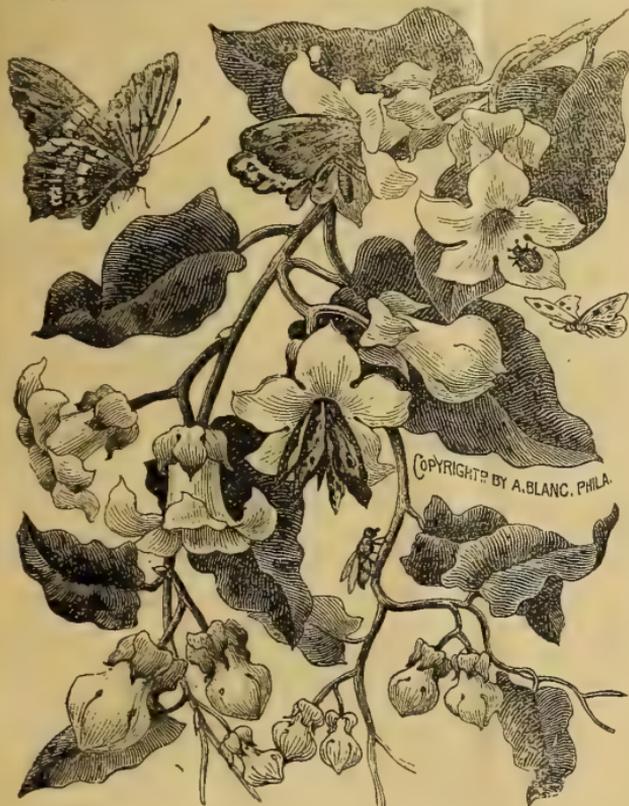

Perfection. One of the finest; its immense globular flowers being marvels of size, rich white color, and beautifully fringed. 10c.

Wm. Joyce. A beautiful fringed variety, variegated rosy carmine and white. A robust grower. 8c.

Pink Beauty. An exquisite shade of delightful pink, finely fringed. 8c.

PERENNIAL PHLOX.

Charming hardy plants, of easy culture. 7c.

PHYSIANTHUS ALBENS.

HARDY PINKS.

These are exceedingly free flowering, hardy spring blooming plants.

Earl of Carlisle. Various shades of maroon and rose, with white. 8c.

Her Majesty. The flowers which are of a large size, similar to a carnation, are of the purest white and very fragrant. It is hardy and gives promise of merit. 8c.

Snow. Of dense, low growth, completely covered with snow-white flowers. 8c.

PHYSIANTHUS ALBENS.

This beautiful climber has thick glossy leaves, and bears rich pure white flowers in pendant clusters, deliciously scented. It has the peculiarity of capturing insects, which are attracted by its highly odoriferous perfume, and thus entrapped in the open flower, struggling, as imprisoned in the sticky nectar contained in the flower, until dead. It is grand as an out-door climber, and may be taken up in the fall and placed in the conservatory or window, where it will continue to bloom and flourish. 15c.

PASSION FLOWERS.

Graceful climbers for window culture, and can be planted out during summer.

Constance Elliott. This is an exquisite fragrant white variety. 10c.

14 **Pfordti.** A beautiful flower, with a grand combination of colors, such as blue, lilac, carmine, etc. It blooms freely when only several feet high. 12c.

PALMS.

Kentia Belmoreana. This is a very elegant Palm, one of the finest for decorative purposes. Leaves pinnate, the divisions taper-pointed. Very easily grown. 35c.

Latania Borbonica. The well known favorite Fan Palm, beautiful in all stages of growth. No plant is more easily grown, and none more tenacious of life, enduring the dust, the cold and heat from open windows, and gas heated air of our dwellings. 25c.

Seaforthia Elegans. This is a stately Palm, growing quickly, and of easy culture. 30c.

Washingtonia Filifera. It has elegant dark green, fan-shaped leaves, from which hang graceful thread-like filaments. The plant is a compact grower, well adapted to pot culture, succeeding in any situation and with any treatment that will keep an ordinary house plant alive. 20c.

PARROT'S FEATHER.

An aquatic suitable for hanging baskets. It has trailing stems with whorls of delicately cut leaves. Plant in a water tight hanging basket, with rich soil and sufficient water to keep the soil covered at all times, and in a short time the beautiful airy stems will droop gracefully over the sides, presenting a charming effect. 7c.

PARDANTHUS SINENSIS.

The Leopard or Blackberry Lily is the name given to this curious chinese lily, bearing on stalks three to four feet high a large number of flowers of the richest colors, yellow and orange spotted with purple and black. These flowers are succeeded by fruits, which can scarcely be distinguished from a blackberry, and these are used for ornaments and for mixing with bouquets of dried grasses. This plant is perfectly hardy. 10c.

PRIMULA. (CHINESE PRIMROSE.)

Few house plants afford better satisfaction than this. It requires to be kept cool, a north situation suiting it best. It is one of our best winter bloomers. 9c.

PELARGONIUMS, or LADY WASHINGTON GERANIUMS.

These are remarkable for their large showy flowers, and for brilliancy of color and markings are, unsurpassed as plants for pot culture. Fine unnamed varieties. 10c.

Crimson King. Bright crimson, very large flowers. 15c.

Dark Knight. Rich deep maroon, marked with fine blotches; free growing. 15c.

Fairy Wand. A rich glistening flesh pink, with dark blotches. 15c.

Victor. Deep rose, flaked with white and marked with very dark blotches. 15c.

Beauty. Crimson-maroon shading to white, dark spot in the center of petals. 15c.

ROSES.

SUPERB EVER-BLOOMING ROSES.

La France. No Rose can surpass this in delicate coloring, which is difficult to describe, but the prevailing color is light silvery pink, shaded with silvery peach. It has a satin sheen over all its petals, and its fragrance is incomparable. 10c.

Christine de Neve. The buds are long and finely pointed, the color is clear, rich maroon or deep purplish-red, passing to lake. A grand new rose. 12c.

Marie Guillot. Perfection in form, flowers large and double to the center. Color a pure white. 8c.

Agrippina. Rich velvety crimson, a very free bloomer, and very satisfactory. 7c.

Snowflake. This is a very floriferous white variety. 8c.

Madame Welche. An extra fine variety. A soft pale yellow, sometimes cream, with short inner petals of glowing orange. 8c.

The Bride. This is, undoubtedly, the finest white rose ever offered to the public. The buds are very large and of exquisite form; the petals are of fine texture and substance, and the full flower is very double. 10c.

HYBRID TEA ROSE—LA FRANCE.

Meïeor. Of the deepest glowing crimson, very double and petals recurring. 8c.
Etoile de Lyon. Blooms in the greatest profusion, and each bud is a gem. The flowers are very large, double, full and deliciously fragrant. The color is a beautiful chrome yellow, deepening at the center to pure golden yellow. 8c.

Hermosa. An old favorite. Always in bloom and always beautiful. The flower is cupped, finely formed and full. Color of the most pleasing shade of pink, soft, but deep. 7c.

Perle des Jardins. Without doubt the finest yellow rose in cultivation. Canary or golden yellow flowers, large and beautifully formed. Handsome in every stage of development, from fullest to the open bud. 10c.

Marechal Neï. One of the largest and most beautiful roses grown. Flowers extra large, very double, deliciously fragrant and of a deep golden-yellow color. 10c.

Papa Gontier. Large, finely formed buds and flowers; fragrant. The flowers are large and long, with thick, broad petals, of a dark carmine crimson, changing to pale rose. 10c.

POLYANTHA ROSES.

Dwarf-growing, profuse bloomers, there being sometimes as many as 100 buds and blooms on one plant. They are healthy and thrifty, and quite hardy—a great merit.

Clothilde Soupert. A hybrid Tea and Polyantha rose; pearl white, carmine center. 8c.

Mignonette. Full and regular, perfectly double; clear pink, changing to white. 8c.

Miniature. One of the most beautiful miniature roses, flowers of an exquisite and regular form. Color white, slightly tinged peachy-pink. A profuse bloomer. 7c.

HARDY CLIMBING ROSES.

Baltimore Belle. Pale blush, nearly white; one of the best climbers. 8c.

Seven Sisters. Blush changing to crimson, free flowering and fragrant. 8c.

Mary Washington. A wonderful free blooming white variety. 10c.

HYBRID PERPETUAL ROSES.

This class is hardy, and will withstand the rigor of our severest winters if protected.

Bell of Snow. A finely formed, pure white rose. Beautiful bell-shaped petals. 10c.

General Jacqueminot. Brilliant crimson, very large globular form; free bloomer. 10c.

General Washington. Rosy carmine, unusually glossy and brilliant; well-formed. 10c.

Jean Liabaud. A rich dark maroon, almost black. A very grand rose. 10c.

Madam Plantier. A grand white rose; especially fine for cemetery planting. 10c.

Paul Neyron. Immense size; probably the largest of all; color deep rose. 10c.

SMILAX.

A fine climbing plant for house culture; valuable in bouquet making. 6c.

SOLANUM.

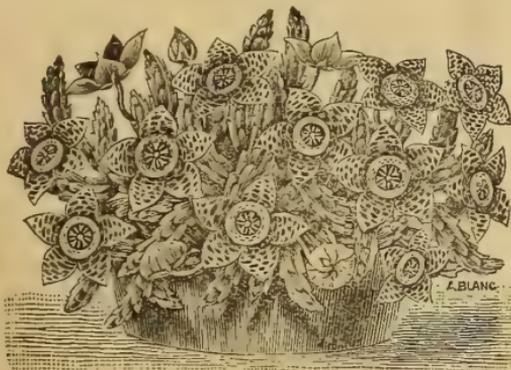

Grandiflora. A very fine climber for the house and out doors during summer, bears a profusion of beautiful star-shaped, pure white flowers in enormous clusters. 7c.

Azureum. In this variety we have a splendid companion to *Solanum Grandiflora*. It is of vigorous growth, climbing rapidly, soon forming a dense mass of bright green. It bears immense panicles of beautiful azure blue flowers that droop gracefully from the suspended vine. It is splendid for garden or pot culture. 6c.

JAPANESE PINK SPIDER LILY.

This plant produces an immense number of rich pinkish salmon flowers during September. The flowers are large, with large undulating petals. Nothing will attract more attention than this beautiful plant, and it will prove an esteemed acquisition in any collection. 10c.

STAPELIA VARIEGATA.

An exceedingly curious and interesting succulent plant, a fine companion for cacti, with which it is sometimes classed though it does not bear the slightest relationship to them. From the base of the fleshy stems appear curious looking five-cornered buds, which gradually swell until, with a snap, they fly open and the flower stands revealed—a perfect star of very thick, leathery petals which are golden yellow, thickly spotted with dark brown. 8c.

TRADESCANTIA.

A good basket plant, commonly called Wandering Jew. Very pretty and effective.

Multicolor. Foliage variegated, green bronze, crimson and sometimes white. 7c.

Repens Vittata. Bright green striped white, very pretty. 7c.

VERONICA.

TUBEROSE—ALBINO.

TUBEROSE.

Producing many beautiful pure white, double flowers on upright stalks; delightfully fragrant. **Excelsior Pearl.** Large bulbs that is sure to give satisfaction. 8c.

Albino. This is a fine new single variety, bearing large spikes of bloom, and is at least one month earlier than the double sort. Foliage is variegated white and yellow. 8c.

TRITOMA UVARIA.

A splendid half-hardy summer and autumn blooming plant, producing magnificent spikes of rich orange red flowers. Protect well, or keep in pots during winter. 16c.

VERBENA.

Nothing can equal the Verbena as a bedding plant if flowers is requisite, as no other plant is so profuse in bloom or present so many striking colors. Unnamed varieties. 5c.

VERONICA.

Plants producing during fall and winter dense spikes of flowers of a beautiful rose color, changing to white. Few plants are more effective or pleasing. 7c.

VINCA.

Harrisoni. A variety of strong growth. Margin of leaves a rich dark green, with central portion yellowish-green. Light blue, star-shaped flowers. 7c.

Variegata. Fine basket plant; leaves glossy green, broadly margined with white. 7c.

SHRUBBY VINCA.

These are excellent for both bedding and pot culture. White. 6c. Rose. 6c.

VIOLETS.

Marie Louise. Bold, fine flowers, very fragrant and very prolific. The color is of a dark blue, flowers double. This is the favorite blue Violet. 8c.

Swanley White. Vigorous and healthy, bearing in great numbers very large, perfectly double flowers of pure snowy whiteness and unequalled fragrance. 8c.

PINK WATER HYACINTH.

PONTERDIA CRASSIPES MAJOR.

One of the most remarkable, curious and beautiful plants we have ever grown. Instead of growing in soil it floats in the water, which it is enabled to do by means of its curiously inflated leaf stalks, which resemble bladders, or balloons, filled with air. A large mass of feathery blue roots grow downward, their ends entering the soil. It forms a lovely rosette of curious, shining green leaves, and throws up spikes of the most exquisite flowers imaginable, resembling, in form, a spike of hyacinth bloom, but as beautiful as many of the choicest and most costly orchids. Each flower is as large, or larger, than a silver dollar; color a beautiful, soft lilac-rose, sparkling as if covered with diamond dust. The upper petal, which is the largest, has a large metallic blue blotch in the center, and in the center of that a small deep, golden yellow spot. Can be grown in the open air in summer and in the window in winter, in anything which will hold water. The most beautiful effect is produced by using a glass vessel of some sort, with shells and white sand so arranged in the bottom as to conceal a small amount of soil. 15c.

"The plants came to hand in good condition, looking so healthy and thrifty that they cannot fail to grow, having such fine roots and stalky bodies. They are beauties, and I feel proud of them I can assure you." Mrs. H. A. HOLCOMB, Riverside, Mich.

FLOWER SEEDS.

My Flower Seeds are fresh and of the best possible quality. I think I can please you in flower seeds, since I have spared no pains to secure the very best obtainable. Seeds and plants may be ordered together to secure clubbing terms, but the plant part of the order must not be less than 25c.

EXPLANATION OF ABBREVIATIONS. a, annual; b, biennial; p, perennial; h, hardy; h h, half hardy; t, tender; g, greenhouse.

ABRONIA.

A pretty creeping verbenalike plant; most exquisite fragrance. h a. 3c.

ASUTILON.

Stately plants with maple-like foliage and beautiful bell-shaped flowers. g p. 5c.

ACACIA.

Elegant shrubs with fine yellow flowers. Soak seed in warm water before sowing. g p. 4c.

BRACHYCOME.

Dwarf plants with pretty cineraria-like flowers. h a. Fine mixed. 3c.

BROWALLIA.

Handsome plants covered with pretty blue and white flowers h a 4c

CENTROSEMA GRANDIFLORA.

CENTROSEMA VIRGINICA GRANDIFLORA.

This is a fine hardy herbaceous perennial vine, rivaling the clematis in wealth of bloom. It forms a dense mass six to eight feet high, which through July and August is covered with sweet pea-like blossoms one and a half to two inches in diameter. The color is a lovely shade of lilac-blue with feathery markings of a deeper shade and a dash of pure white in the center of each flower. It is perfectly hardy and will thrive everywhere. 15c.

CALCEOLARIA.

CACALIA. 19

Showy plants of easy culture, producing rich tassel-shaped, yellow flowers. 3c

CALCEOLARIA

A superb ornamental house plant, producing a mass of pocket like flowers early in spring. g p. 1 offer a mixture of large flowering varieties. 6c.

CALENDULA.

Beautiful hardy annuals, making a grand display with their elegant double orange yellow flowers. 3c.

CANDITUFT.

These are excellent for cut flowers, and unsurpassed for massing. h a. 3c.

CANNA.

This is exceedingly ornamental and imparts a tropical appearance to any garden where it is

grown. Soak seed in warm water. t p. Crozy's New Dwarf Hybrids. Fine mixed. 6c.

CANARY BIRD FLOWER.

A rapid climber, producing an abundance of canary colored flowers. h h a. 6c.

CANTERBURY BELLS.

Popular hardy, herbaceous perennials, bearing a great profusion of bloom.

Single. Fine colors mixed. 3c.

Double. Very pleasing colors mixed. 4c.

CARNATION.

Remarkable for delicate markings and delightful fragrance. h p.

Vienna. Mixed double dwarf varieties. 5c.

Marguerite. This beautiful carnation blooms as freely and quickly as the chinese pinks. It is unsurpassed for house culture and unrivaled in brilliancy of color. 5c.

CHRYSANTHEMUM.

A very popular annual that succeeds with very little care in almost any situation.

Coronarium. Double white and yellow. 3c.

CINERARIA.

A very popular plant for

COCKSCOMB.

CASSIA
CHAMÆCRISTA

house culture, blooming during winter and spring, g p.

Single. Finest varieties mixed. 5c.

Double. An excellent strain. 8c.

CENTAUREA.

One of our most attractive hardy annuals, constant and free bloomer. Excellent for cut flowers. Rich colors. 3c.

CALIFORNIA
YELLOW BELLS.

CASSIA.

Chamæcrista. This is our native Partridge Sensitive Pea, an interesting annual with compound leaves which droop and fold together when touched. The flowers are large, of a canary yellow, two of the petals being purple spotted at the base. The flowers are produced freely. 12c.

CLARKIA.

Free-flowering, attractive hardy annuals, producing rich, airy flowers of delicate colors. 3c.

COBAEA SCANDENS.

A quick growing climber, with large bell-shaped purple flowers. Plant seed: edgewise to facilitate germination. t a. 5c.

COCKSCOMB.

Curious and interesting, a most satisfactory garden plant. h h a. 4c.

COLEUS.

One of our finest foliage plants, sporting into an endless variety of colors and shades. I offer a selected strain. t p. 7c.

CALIFORNIA YELLOW BELLS.

This forms a broad bush with numerous branches, which is fairly loaded with bell-shaped flowers of a delicate cream color. We have seen nothing that can compare with this in profusion of bloom. 12c.

CONVOLVULUS.

This is the popular Morning Glory: an ornamental climber of merit. Mixed. a. 3c.

COOPERIA.

A charming bulbous plant producing numerous beautiful white flowers. t. p. 4c.

COSMOS.

Plants growing fully five feet high, covered with hundreds of showy blossoms two inches in diameter; rich colors. h h a. 4c.

CUPHEA. (Lady's Cigar Plant.)

A very free flowering plant, bearing tubular flowers of a bright red color, tipped with white. h h a. 5c.

CYCLAMEN.

One of the most popular winter blooming plants, with beautiful foliage and rich orchid-like, fragrant flowers. h h p. 6c. Fine bulbs. 12c

DAHLIA.

This is a universal favorite in all gardens, and no flower is more attractive. p.

Single. Finest varieties mixed. 4c.

Double. Superlative mixture. 7c.

DATURA.

Remarkably large trumpet-shaped flowers. h a.

Alba. Double white. 4c.

Violacea. Double purple. 4c.

**HIBISCUS—SUNSET.****DELPHINUM.** (Larkspur.)

Charming annuals and perennials, flowering early in the spring.

Double Dwarf Rocket, Hyacinth-flowered, annual variety. 3c.

Perennial Varieties. Fine mixed. 5c.

DIANTHUS. (Pink.)

This is among the most brilliant class of plants grown, showing a singular diversity of coloring in the pencillings of the petals, not found in other flowers. h p.

Chinensis. Finest double mixed. 3c.

Hedewigi. Brilliant markings and dazzling colors. 4c.

DIGITALIS. (Fox Glove.)

Produces dense spikes of pretty spotted flowers of various rich and brilliant colors. h p. 4c.

ECHINOCYSTIS. (Wild Cucumber.)

This is the quickest growing climber in our list. It will grow thirty feet in one season, has dense, graceful foliage which is thickly dotted over with pretty white fragrant flowers. These in turn are followed by an abundance of small ornamental and prickly seed pods. h a. 4c.

ERYTHRINA.

This grand shrub is the coral tree, which bears immense spikes of brilliant pea shaped flowers in shades of red. t p. 5c.

ESCHSCHOLTZIA.

Annual plants with bright showy flowers; fine for bedding and massing. 3c.

EUCALYPTUS.

This makes a pretty tree, and is an object of interest in sub-tropical gardening or pot culture. t p. 6c.

FEVERFEW.

Admirably adapted for pots and bedding, produces pure white, double flowers, that are splendid for bouquets. h h p. 4c.

GAILLARDIA.

This is a free flowering and attractive plant, of easy culture

and neat habit. a. 3c.

GENTIAN.

A charming hardy perennial, with rich blue flowers which blooms early in May. Fine for edgings. 5c.

GERANIUM.

Popular garden and house plants. Fine varieties in mixture. t p. 7c.

GLADIOLUS.

Few flowers can equal these for gorgeous display throughout the summer. h h p. 6c.

GLOXINIA.

A superb genus of house plants, profuse bloomers of great beauty and diversity of colors and shades. g p. 6c.

GOETIA.

Beautiful and delicate flowers that deserve a place in every garden. h a. 3c.

GOMPHRENA.

A beautiful everlasting of fine globular shape. Mixed colors. h h a. 3c.

GOURDS.

Rapid growing, interesting plants, with ornamental foliage, and varieties of singular shaped fruit. ta. 3c.

HIBISCUS.

Crimson Eye. This is a stately plant with flowers of immense size, often measuring six inches in diameter. The color is pure white, with velvety crimson eye, forming an effective contrast. It is a hardy perennial, of the easiest culture and will succeed anywhere. 6c.

Sunset. This is a new variety of wonderful beauty. Its flowers are of enormous size; the color is rich deep cream with a velvety maroon center. The plant is not quite hardy, but the roots can easily be wintered in a cellar. 8c.

HIBISCUS—CRIMSON EYE.

22 HELICHRYSUM.

A fine everlasting, extra double; dark rich colors. h a. 3c.

HOLLYHOCK.

This is an old favorite. My strain of double Hollyhock is unsurpassed for richness of color and size. 5c.

HELIOTROPE.

Deliciously fragrant plants, excellent for bedding and pot culture. t p. 5c.

HYACINTHUS CANDICANS.

Large growing summer blooming hyacinth, with pure white, bell-shaped flowers, on erect stems two to three feet high. 4c.

ICE PLANT.

A fine basket plant, with glittering, icy foliage and white flowers. h a. 4c.

IMPATIENS SULTANI.

A fine pot plant, also very desirable for planting out during summer, producing its carmine flowers in great abundance. t p. 7c.

IPOMOEÆ.

Purpurea fl. pl. The number of hardy annual climbers is not very great, and we do not doubt a moment but that this first double Morning Glory ever introduced will be hailed as a welcome addition to this class of plants.

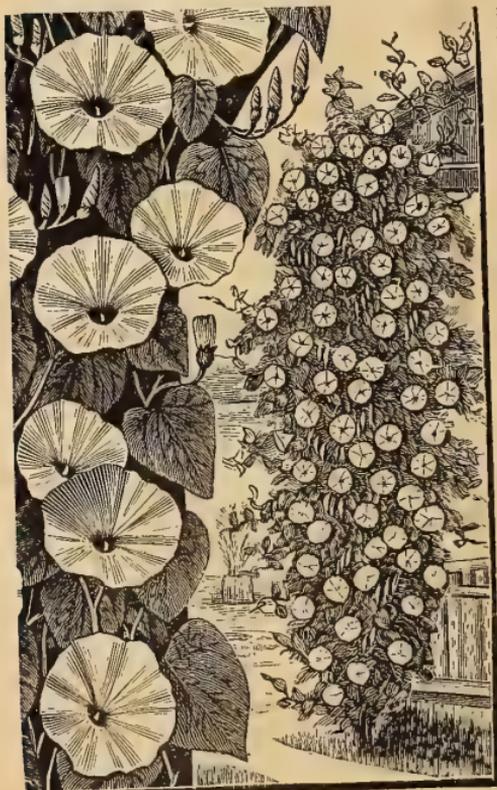

IPOMOEÆ PURPUREA FL. PL.

It is of rapid growth and produces its double flowers very freely. Color white, tinted with red or blue at base of petals. 8c.

Heavenly Blue. This new climber has the loveliest sky blue flowers imaginable, fully four inches across, and is produced so freely as to resemble a light airy cloud, streaked with darker veinings of the foliage. It is the loveliest of the Ipomoeas. 8c.

Quamoelit. This is the popular Cypress Vine, a climber with delicately cut foliage and pretty white and scarlet flowers. 3c.

IPOMOEÆ HEAVENLY BLUE.

HELIOTROPE.

LANTANA.

Handsome, free-blooming plants, very effective either for pot culture or bedding. The flowers have changeable colors. t p. 5c.

LOBELIA.

Low growing trailing plants, excellent for beds, borders, hanging baskets and vases, beautiful colored flowers. 4c.

A. BLANC

HOLLYHOCK.

LANTANA

MARIGOLD.

**KOSTELETZKIA.**

This is a hardy perennial attaining a height of three feet, it is so floriferous the entire summer as to present a solid mass of pink. The flowers are two inches in diameter, round and regular, color bright pink with delicate veenings. It is easily grown and will thrive in any situation. 15c.

LYCHNIS.

Hardy perennials producing fine clusters of flowers of various colors. 3c.

MARIGOLD.

This is a very beautiful and striking plant, with a great variety of colors. 1c.

Large African. Tall, double, orange, brown and yellow colors in mixture. 8c.

Dwarf French. Fine colors, very double; fine mixed. 3c.

LUFFA.**Dish-Cloth Gourd.**

This remarkable Gourd will not only shade your porch, but the matured fruit, with its peculiar lining, will furnish you a Natural Dish-Cloth, sponge-like and porous, useful for the bath and other purposes. It also makes a novel bonnet. The fruit is very ornamental and contrasts beautifully with the dark green foliage and bright yellow flowers. 4c.

MAURANDIA.

A beautiful climber, suitable for house and out-door culture, producing its white and purple flowers in abundance all summer. t p. 5c.

MIRABILIS.

This is the popular Four O'Clock, a universal favorite and a most satisfactory bloomer. h a. 3c.

MIGNONETTE.

The delightful fragrance and easy culture of this old plant makes it one of the most popular annuals.

Grandiflora. A fine mixture of large flowering varieties. 3c.

Golden Queen. A new yellow variety. 4c.

Machel. A new red variety, fine for pot culture. 4c.

Miles' Spiral. Finest white variety. 4c.

MYOSOTIS. (Forget-Me-Not.)

A perennial plant that blooms the first season if started early. Succeeds in a moist shady situation. It bears small, lovely blue flowers that are much prized for bouquets. 4c.

NICOTIANA AFFINIS.

LUFFA OR DISH-CLOTH GOURD.

NASTURTIUM.

This is one of the brightest of our garden plants. h a. Tall mixed. Very fine climbers. 3c. Dwarf Varieties. These are excellent for bedding. Mixed. 3c. **Beauty.** Scarlet and yellow. 3c. **Empress of India.** Scarlet, dark foliage. 4c. **Lady Bird.** Yellow and crimson. 4c. **Roseum.** Fine rose. 3c. **Pearl.** Creamy white. 4c.

NICOTIANA.

Affinis. A rich ornamental plant with large, fragrant white flowers. Fine for groups; may be taken into the house in the fall where it will bloom during winter. 5c.

Giant Red Flowered. The foliage is luxuriant and tropical in appearance; plants surmounted with immense clusters of rich crimson flowers. They grow rapidly, about five feet in height and commence to bloom in July and continue until frost. t p. 5c.

NIGELLA.

Showy and curious flowers, and finely divided, handsome foliage. h a. 3c.

PANSY.

I offer some of the finest strains of Pansies that can be secured. h b.

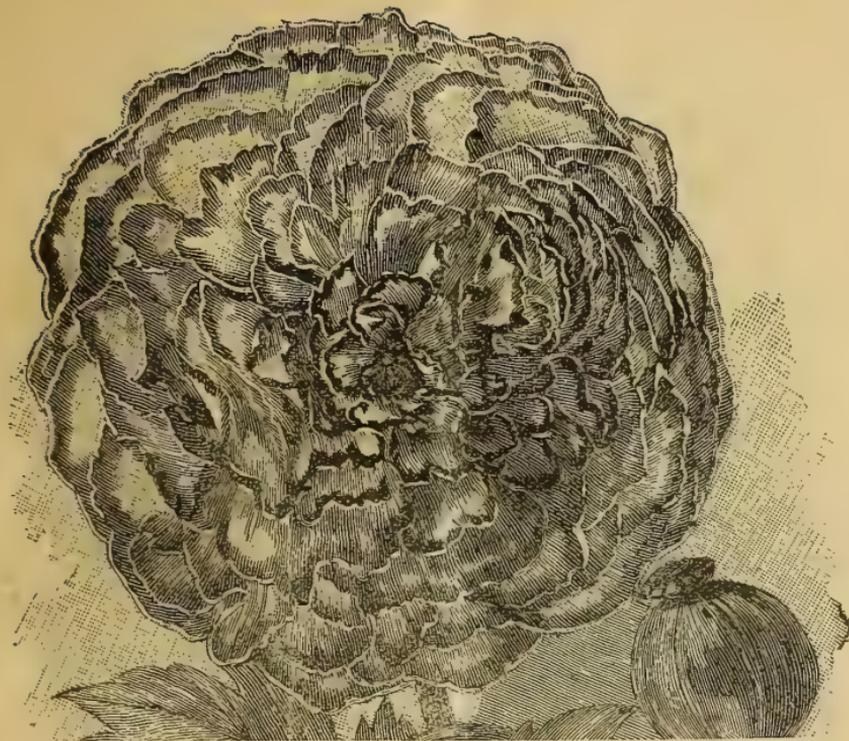

Superb Mixture. Very fine varieties. 4c.

International Prize. These are wonders in size, perfection of form, and beauty. 5c.

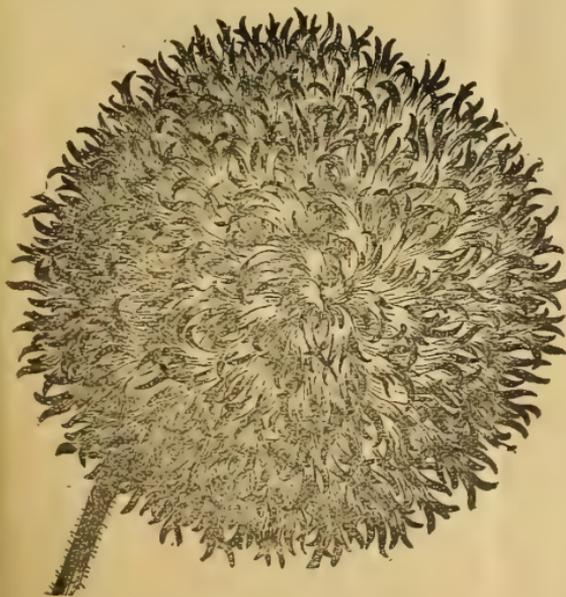

Trimardeau. Extremely large flowers, with fine colors and beautiful markings. 6c.

King of the Blacks. Almost coal black. 4c.

Silver Banded. Violet, with beautiful border; a very charming variety. 5c.

AMERICAN FLAG POPPY.

BRILLIANT POPPY.

Snow Queen. A charming white variety. 4c.

Gold Banded. Dark mahogany, with golden edge. 5c.

Improved Striped. A new variety richly marked with distinct stripes. 5c.

Dark Blue. Large and fine. 4c.

Light Blue. Large and grand. 4c.

Cassier. This is the Five Blotched Giant, one of the largest and the most gorgeously colored Pansy yet brought out. 10c.

POPPY.

One of the most showy garden plants; flowers large and very brilliant. h a.

American Flag. This new variety is very double and charmingly colored; a pure white ground margined dark orange scarlet. Very large and conspicuous. 5c.

Brilliant This new variety has finely fringed petals, which are pure white, with a pink tinge, scarlet, rose, purple and other shades. The ends of the petals are frequently of a deeper tint. Very brilliant and dazzling. 8c.

Doublemixed. A very fine strain. 3c.

PASSION FLOWER.

New Mammoth. Flowers very large and showy, having a feathery white border, with a pink center; between center and border

RICINUS ZANZIBARIENSIS—THE AFRICAN WONDER.

is a sky-blue circle. A fine climber, hhp. 4c.

PETUNIA.

A splendid plant for bedding, h h p. Finest mixed, 3c. Double Fimbriata Grandiflora. My excellent strain will produce many fine double fringed flowers. 7c.

PHLOX DRUMONDI.

For a splendid mass of color and a constant display, this annual cannot be equalled, the colors ranging from the purest white to the deepest crimson. I offer a strain of the best large flowering varieties in superb mixture. 4c.

PERENNIAL PHLOX.

Few hardy flowers can compare with this for effect and display. h p. 5c.

PLATYCODON GRANDIFLORA.

A hardy plant with star-shaped flowers 3 inches across, of beautiful blue and white colors. h p. 5c.

PORTULACA.

Low growing plants of easy culture,

blooming all summer. Fine for massing in beds. t a. Double Mixed. 5c.

PRIMULA, (Chinese Primrose.)

One of the most satisfactory house plants that can be grown from seed. Superfine Mixture. Finest fringed. 6c

RICINUS.

Zanzibariensis. This grows to mammoth proportions, the plant attaining a height of twelve to fourteen feet. The leaves are fully two and a half feet broad, beautifully lobed; the whole plant has a distinct and novel appearance, enhanced in the sunshine by a bright metallic hue; they charm at first sight, and their usefulness is very great. Solitary on the lawn, it makes a perfect pyramid of foliage, thickly set with gigantic leaves; a dozen in a large bed make a most picturesque sight, &c.

Mixed Varieties. Very fine sorts. 3c.

**SALPINGLOSSIS.**

Richly colored, marbled and pencilled blossoms. Of easy culture and great beauty. h a. Grandiflora. The best. 4c.

SCABIOSA. (Mourning Bride.)

Beautiful double flowers of rich colors. Useful for bouquets and cut flowers. h a. 3c

SCHINUS MOLLE.

A graceful evergreen tree, with small white flowers, followed by lovely clusters of small red berries. Fine for pots. 5c.

SMILAX.

A charming climber for the house. Fine for decorations and indispensable for bouquet work where delicate foliage is desirable. t p. 5c.

SOLANUM.

Bears brilliant scarlet fruit, which retains its bright color and form long after ripe; fine for decorations. g p. 5c.

SWEET PEAS.

Emily Henderson. This new sweet pea is absolutely pure white, as clear as alabaster and glistening as satin. The flowers are extra large, of remarkable substance, and in form perfection; in profusion of bloom it is a phenomenon, one plant having produced 1035 sprays of bloom in one season. 4c.; oz. 10c.

Adonis. Deep rose and carmine. 3c. oz. 7c.

American Belle. This a wonderful new variety; the standard is rose, and the wings are white with carmine spots. See illustration on cover. 8c.

Apple Blossom. Pink and white. 3c.; oz. 7c.

Blanche Ferry. Rose and white. 3c.; oz. 7c.

Capt. Clark. A tri-color variety. 3c.; oz. 7c.

Orange Prince. Orange scarlet. 3c.; oz. 7c.

Princess of Wales. White, clouded and striped with blue and purple. 3c.; oz. 7c.

Splendor. Crimson-rose. 3c.; oz. 7c.

Fine Mixed. A fine strain. 3c.; oz. 6c.

SENSITIVE PLANT.

Curious and interesting plants, with pinkish white flowers; the leaves close and droop when being touched. t a. 3c.

STOCKS.

The Stock is one of the most popular plants, either for bedding, massing or pot culture; for brilliancy and diversity of colors or profusion and duration of bloom it is unsurpassed. Best German Large-Flowering Ten Week Stocks Mixed. 7c.

THUNBERGIA.

A free-blooming climber well adapted for the house or warm situations out of doors. h h a. 4c.

TORENIA FOURNIERI.

Fine for house and out-door culture. They are covered with one mass of bloom throughout the season. Flowers velvety-blue, with spots of dark blue and a bright yellow throat 7c.

**SOLANUM.**

SWEET WILLIAM.

An old favorite plant, which has greatly been improved of late years, producing a splendid effect in beds and shrubbery with their rich and varied flowers. h p.

Double Mixed. Splendid. 4c.

Harlequin. This is very attractive, bearing numerous large heads of flowers, from 4 to 5 inches across, each head being composed of different colored florets, such as dark crimson, white, pink, flesh, striped, etc.; these colors banking against each other in charming confusion, produces a very bizarre effect, and brings out a richness and vividness of coloring by the sharp contrasts that we have never before seen equaled. 15c.

VALERIANA. (Hardy Heliotrope.)

A beautiful border plant bearing large corymbs of small scarlet, white and red flowers. Very fragrant and fine for bouquets or cut flowers. h p. 4c.

VERBENA.

This is a popular plant for bedding, mak-

ing a gorgeous display of flowers during summer and autumn. I offer a superb strain of the choicest large flowering varieties in charming colors. 4c.

VIOLA ODORATA. (Sweet Violet.)

This is a well known favorite of profuse blooming qualities, and delicious fragrance. If removed in the fall it will bloom in the house during winter. h p. 5c.

WALLFLOWER.

Nothing can excel this for fragrance and beauty. The large double flowers are charming for bouquets. h h p. 7c.

YUCCA FILAMENTOSA.

A beautiful hardy perennial producing fine specimens; bell-shaped flowers. 4c.

ZINNIA.

Double Zinnias are quite an acquisition in our list of garden favorites. It rivals the Dahlia in beauty and brilliancy. h a. Finest double mixture, splendid. 3c.

"I am more than pleased with the plants received from you a few days ago, they were as fresh as when packed and have not wilted since they were potted. I shall take pleasure in recommending your plants to all. Accept thanks for extras." MRS. ASA MORRISON, Franklin Falls, N. H.

VEGETABLE SEEDS.

29

Some seedsmen are continually harping on the superiority of their seeds, and being so much better they of course must charge a higher price. Many people are by this incessant cry of good seeds at high prices only, lead to believe that the seeds offered by other seedsmen at reasonable prices are of inferior quality. This is an error; any seedsmen that wishes to continue a business is not apt to palm off spurious stock on his customers. If a person in the trade should wish to purchase seeds at wholesale from these high-priced concerns they are quite willing to part with their superior stock at ruling prices, which tends to demonstrate that among brethren their seeds are not considered so overpowering superior. I know I can furnish you as good seeds as any other firm, and if I do so at reasonable prices I think I am entitled to a share of your patronage. Unless otherwise specified I will sell $\frac{1}{2}$ lbs at pound rates. The prices include postage, and I guarantee safe arrival.

ASPARAGUS.

Conover's Colossal. Large, tender and of good quality. pkt. 3c., oz. 6c., 1-4 lb. 15c.

Palmetto. Strong and robust growth, a new and superior variety. pkt. 4c., oz. 7c.

BEANS—BUSH.

Early Mohawk. Very hardy, early and productive. Excellent as a string bean, the pods being very thick, succulent and tender. pkt. 6c., pint 16c., quart 30c.

Early Red Valentine. One of the best, having round fleshy pods, which mature quickly and remain tender and brittle very long. pkt. 6c., pt. 16c., qt. 30c.

New Golden-Eyed Wax. This is a universal favorite with market gardeners on account of its hardy and prolific character. Very early and vigorous, yielding profusely. Pods are entirely stringless and of unexcelled flavor. pkt. 6c., pt. 25c. qt. 45c.

Dwarf German Black Wax. The finest of all snap sorts. Pods transparent and snap like pipe stems. Boils rich as butter. pkt. 6c., pt. 22c., qt. 40c.

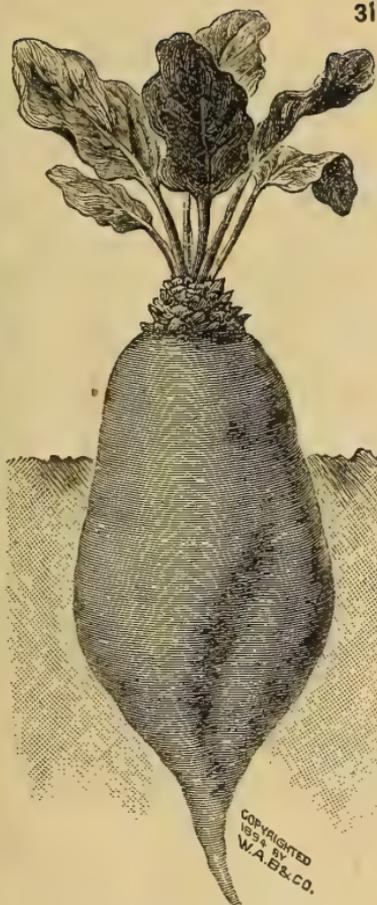

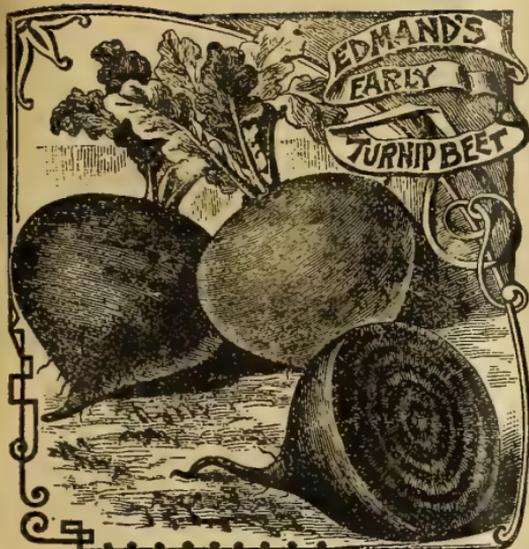

Henderson's Bush Lima. A veritable acquisition, that is destined to hold the prominent place accorded it on introduction. Dwarf, compact bush form, requiring no support, and produces enormous crops of delicious lima beans. The earliest of the limas. pkt. 6c., pt. 25c., qt. 45c.

BURPEE'S BUSH LIMA BEAN.

This is the only true bush form of the large lima, distinct and superior in every way—in its splendidly vigorous, upright, bushy habit of growth, great uniformity and trueness of type, and always bearing the delicious large lima beans in great abundance. There is absolutely nothing to compare with it. The largest lima beans can now be raised in quantity at small cost, without the expense and labor attached to poles. Don't fail to try this. Pkt. 8c., pt. 30c., qt. 55c.

EGYPTIAN TURNIP BEET.

NEW DANISH SUGAR BEET.

BEANS—POLE.

Large Lima. Large and vigorous growth; luscious flavor Pkt. 6c., pt. 35c., qt. 60c.

Dutch Case Knife. Pods long, green and flat; can be either snapped or shelled when used. Very early and productive Pkt. 6c., pt. 25c.

BEET.

Early Egyptian Turnip. An early and superior variety, tender and of excellent quality. One of the best. Pkt. 3c., oz. 6c., 1-4 lb. 14c., lb. 45c.

Edmand's Early Turnip. The perfection of a beet for the market gardener and family use; very early. Pkt. 3c., oz. 5c., 1-4 lb. 12c., lb. 40c.

Eclipse. Extra early, of rapid growth, small top, and extra fine quality. Flesh intense red, fine grained. Pkt. 3c., oz. 6c., 1-4 lb. 14c., lb. 40c.

Long Dark Blood. The standard late sort, of fine quality; productive, and fine for winter use. Pkt. 3c., oz. 5c., 1-4 lb. 12c., lb. 40c.

MANGEL BEET—FOR STOCK.

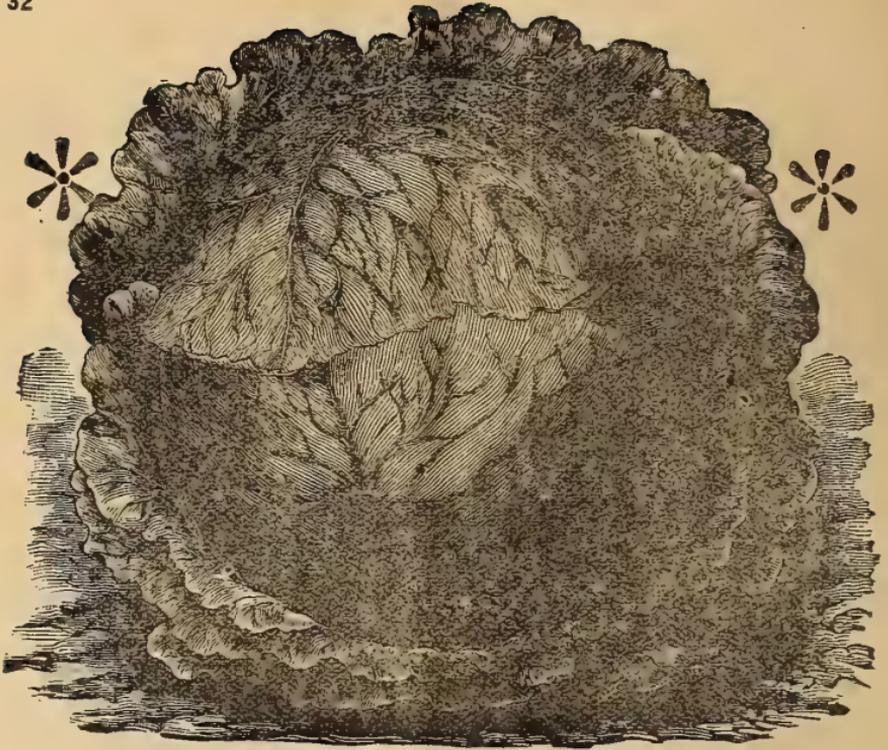

Long Red Mangel. Large, productive variety for stock. It grows to enormous size. Pkt. 3c., oz. 5c., 1-4 lb. 12c., lb. 40c.

Golden Tankard. Large, bright yellow mangel beet; productive, an excellent for feeding stock. Pkt. 3c., oz. 5c., 1-4 lb. 12c., lb. 40c.

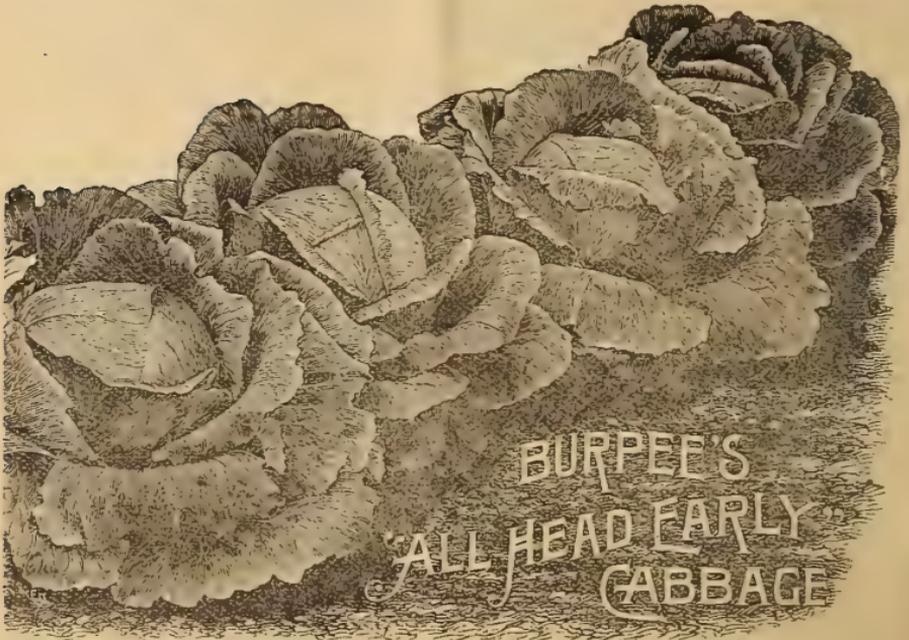

NEW DANISH IMPROVED SUGAR BEET.

This new sugar beet is particularly adapted for stock feeding, it growing to a very large size, and is superior to Mangels for feeding purposes on account of its rich contents of sugar. Pkt. 6c., oz. 10c., 1-4 lb. 25c., lb. 90c.

L. DARK BLOOD.

ANDERSON'S SELECTED SUREHEAD CABBAGE.

BURPEE'S SAFE-CROP CABBAGE.

EARLY WINNINGSTADT CABBAGE.

BORECOLE.

Curled Scotch Kale. Used for greens. If sown at intervals a succession of crops can be had throughout the season..... 4 10 30 1 10

BRUSSEL SPROUTS.

Produces from the stem small heads, mild flavor, best when touched by frost. Treat the same as late cabbage..... 4 10 30

CABBAGE.

	pkt.	oz.	½ lb.	lb.
Extra Early Jersey Wakefield. Undoubtedly the best early cabbage grown; large, compact and sure heading. Finest strain of seed..	4	15	50	1 75

MUSK MELON.

Princess. A fine new variety, thick salmon colored flesh, of good size and very productive, 8 melons having been grown on a vine.	4	7	20	70
Banana. Creamy white or straw color; in shape it resembles a great banana, and rivals it in delicious flavor. Grows 2 feet long.	4	7	20	70
Golden Gem. Globe-shaped, uniform in size, flesh light green, and of delicious flavor. Very prolific and extra early in ripening....	4	7	20	70
New Early Hackensack. Flesh light green and of delicious flavor; one of the best melons for table use and market.....	4	7	20	70
White Japan. Early, medium size, white, flesh thick and sweet....	3	6	15	50
Netted Nutmeg. Flesh green, thick and of fine flavor; very popular.	3	6	15	50

This is a very handsome, medium sized melon, the size is convenient for both marketer and consumer, being neither too large nor too small. The skin is of a very pretty, bright, glossy yellow color when fully ripe, and is nearly hidden by the very thick whitish netting. Its luscious green flesh is very thick, leaving only a small seed cavity. It has never been known to burst open at either end. It has proved itself to be one of the best, if not the very best shipper known. From the above considerations we are confident

this melon will prove to be a great acquisition. Pkt. 5c.; oz. 12c.; $\frac{1}{4}$ lb. 30c.

LIVINGSTON'S MARKET MUSKMELON.

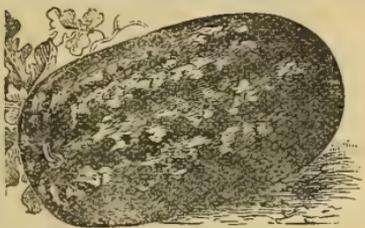

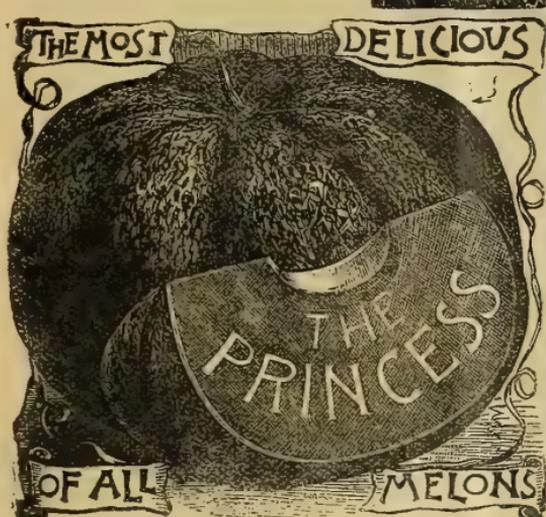

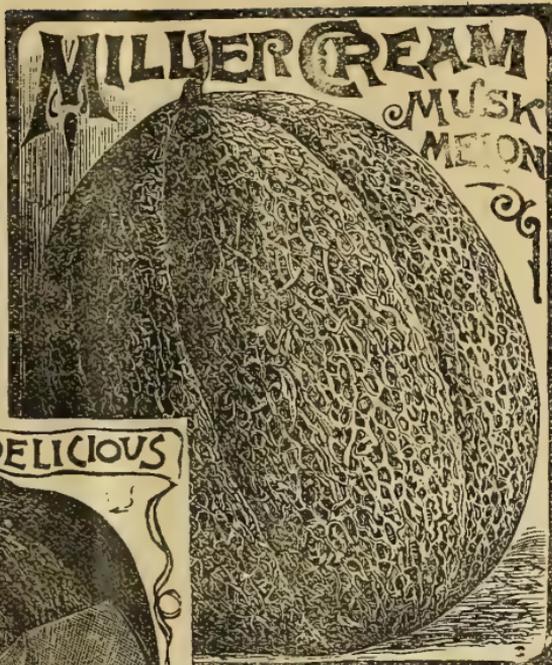

Many years were spent in perfecting this King of Melons which is specially adapted to market gardeners' use. A most valuable and beautiful characteristic is the close, strong netting. It produces scarcely a small melon, and it matures all melons that set. It is a green fleshed variety with a small seed cavity, and remarkably little waste next the rind. Pkt. 5c.; oz. 10c.; $\frac{1}{4}$ lb. 30c.; lb. \$1.00.

Forten years my seeds have given universal satisfaction to my numerous customers, if you have not yet tried them do so this year and let me demonstrate to you that good and reliable seeds can be sold at reasonable prices. ALL ask is trial.

BANANA MUSKMELON

FLORIDA FAVORITE WATERMELON.

MUSK MELON—Continued.

	pkt.	oz.	½lb.	lb.
Miller Cream or Osage. The flesh is rich salmon in color, so thick it is almost solid, very delicious and sweet. Very productive....	4	8	25	80
Delmonica. This new melon is of oval shape and thick-meat. It is also of large size, with orange-pink flesh, of sweet rich flavor.	4	8	25	80

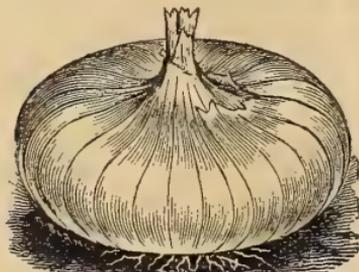

WATERMELON.

The Dixie. This excellent new melon is conceded to be the most productive, finest eating, and best shipper ever introduced.....	4	6	15	50

EARLY WATERMELON.

We have had early melons of good quality, but this is the first extra early watermelon of fine quality that is also of large size. From seed planted on the tenth day of May, large, ripe melons were picked the last week in July, thus demonstrating its inbred character of maturing extra early.

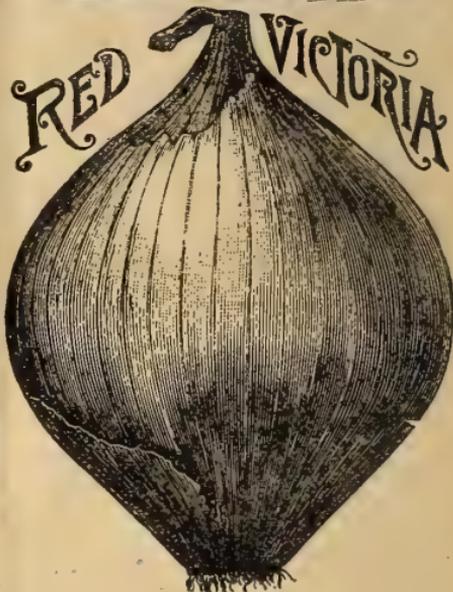

As shown in the illustration, engraved from a photograph directly on the wood, the form is nearly round. The average weight of the melons, even during an exceptionally bad season, was thirty-five pounds each,—a size rarely attained by any other early melon. The rind is tough, making it valuable for shipping. Flesh bright red and very sweet. Pkt. 5c., oz. 12c., 1-4 lb. 40c., lb. \$1.40.

MAMMOTH SILVER KING.

DANVERS YELLOW GLOBE ONION.

WATERMELON—Continued.

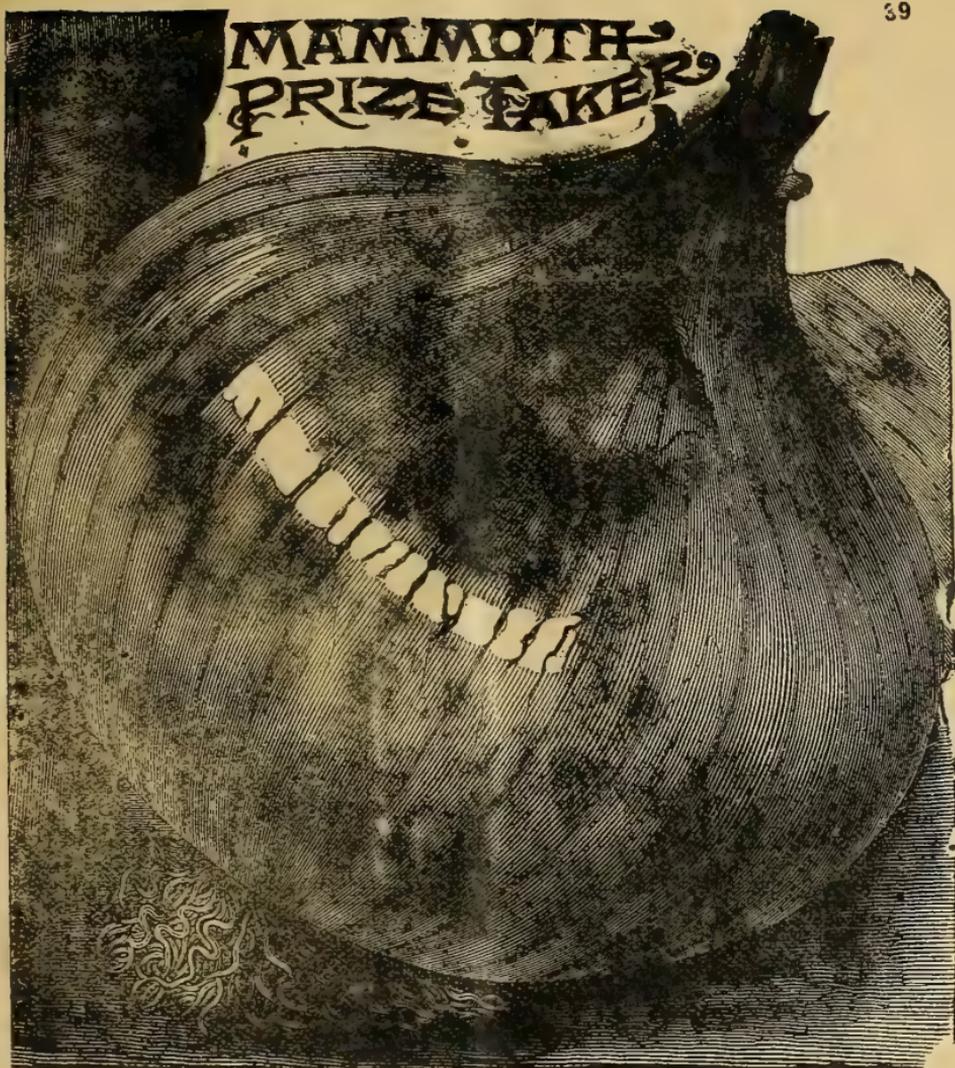

Hungarian Honey. Early, productive, sweet and luscious; rich honey flavor; flesh brilliant red, melting and delicious.....

Citron Melon. This is used for preserves only, for which it is fine.

ONION.

Extra Early Red. The earliest, fine grained, close and solid.....
 Large Red Wethersfield. An immense yielder and a good keeper....
 Danvers Yellow Globe. The standard yellow market onion.....
 Mammoth Silver King. Very large, early, uniform in size, fine shape; white, tender, and of very mild, sweet flavor.....
 Red Victoria. This variety has attained the enormous weight of 4 pounds. Flavor very mild and sweet. A very good keeper.....

Citron Melon	3	6	20	
Extra Early Red	4	12	40	
Large Red Wethersfield	4	12	40	1 50
Danvers Yellow Globe	4	12	40	1 50
Mammoth Silver King	5	16		1 80
Red Victoria	6	20		35

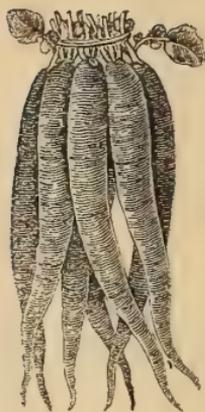

MAMMOTH PRIZETAKER ONION.

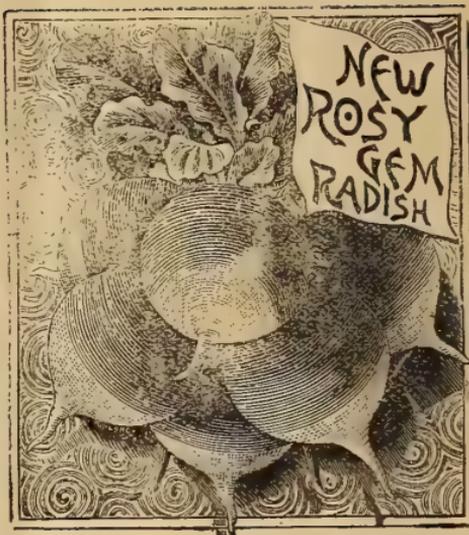

This is undoubtedly the largest, handsomest and most profitable onion ever grown. The outside skin is of a rich yellow color, while the flesh is white, mild and tender, and may be eaten raw as an apple. Often grows to the weight of three or four pounds, with a diameter of five to seven inches. They bottom well, are quite free from stiff necks, and have produced more bushels of marketable onions to the acre than any other variety yet known. In market it attracts marked attention, and when placed on sale with other popular varieties, has always been selected and purchased, though at a higher price, in preference to any other sort, either red, white or yellow. Pkt. 5c., oz. 15c., $\frac{1}{2}$ lb. 50c., lb. 1.90.

“Received plants and seeds in fine condition. Thanks for extra seeds and plants. The plants were the largest and finest I ever received from any firm, and I am sure they will bring you many customers when shown to my friends.

MRS. M. M. MANN, Frankfort, Kan.

LONG SCARLET.

PARSNIP.

Fine Sugar. Long, white, smooth, and considered by all to be the best flavored parsnip grown. A universal market variety.....

PARSLEY.

Double Curled. Dwarf and tender, leaves beautifully curled.....

PEAS.

Extra Early. One of the best smooth varieties; of fine flavor.....

McLean's Little Gem. Matures very early, exceedingly productive.

This is one of the very best wrinkled varieties. 1 foot high.....

American Wonder. Very early, wrinkled, and a perfect wonder of

productiveness; tender and sweet. 1 foot high.....

Bliss' Everbearing. Strong and branching; large, sweet and produc-

tive; continues bearing long. 2 feet high.....

Royal Dwarf White Marrowfat. The best white marrowfat pea.....

Dwarf Sugar. Edible pods, can be used green like a snap bean.....

PEPPER.

Golden Dawn. Very productive, golden-yellow color, excellent quality, scarlet, and mild flavor. This is a much grown, valuable sort..

Ruby King. Grows to a large size, bright ruby-red color, and remarkably mild and pleasant to the taste. This is a beautiful variety.

Long Red Cayenne. Long slim pod, red, very strong and pungent..

PUMPKIN.

Tennessee Sweet Potato. Unsurpassed for pies; hardy and productive

Connecticut Field. Valuable for stock; very productive.....

RADISH.

Rosy Gem. Absolutely the earliest radish in cultivation. Globe-shaped, scarlet, shading to white; tender crisp and delicious....

Chartier. A fine long variety; scarlet shading to white. Crisp, tender and of mild flavor. It retains its good qualities long.....

White Strasburg. Medium long, pure white, firm brittle and tender, retaining its crispness even when the roots are old and large....

Scarlet Turnip. Small top, quick growth, crisp and tender.....

Long Scarlet. Very brittle and crisp, and of quick growth.....

California Mammoth White Winter. Large, white, firm, fine flavor....

Chinese Rose Winter. Medium size, excellent quality; rose color..

SALSIFY (Vegetable Oyster).

Mammoth Sandwich Islands. Grows uniformly to an extra large size; of superior quality and very fine flavor. The very best...

SPINACH.

Long Standing. A new variety of great promise; best for greens.

Savoylea. Leaves large, wrinkled, thick and round; very fine....

CHARTIER RADISH.

EUREKA SQUASH.

The flesh of this squash is very thick and fine grained and either steamed or boiled is of extra fine quality, and when baked the Eureka is simply perfection itself. It weighs 20 to 25 lbs. and for a squash of this size is wonderfully prolific, a vigorous vine producing two to three large sized fruits. This may be called a soft shelled squash, although when well matured its shell becomes quite hard, but not enough so that stock can not readily eat them. This feature with its thick, rich, salmon colored flesh, and prolificness, make it specially desirable for feeding, at the same time being a most excellent table variety. Pkt. 5c.; oz. 12c.; 1/4 lb. 35c.; lb. \$1.20.

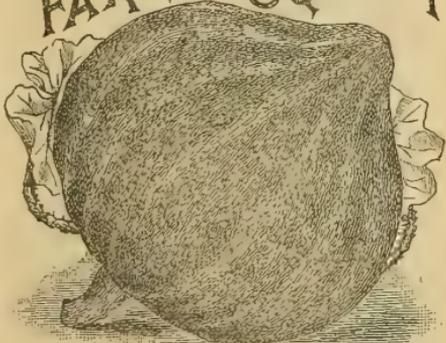

EUREKA SQUASH.

THE FAXON SQUASH.

The flesh of this new variety is deep orange yellow, cavity very small and seeds few; the special peculiarity, however, is that, while uncooked it appears to have a shell like any squash, when cooked there is practically none. It is the best squash we ever tasted—sweet or dry—and for squash pies it must be tried to be appreciated. It matures early and can be used as a summer squash. It is the best winter variety we know of, being a very late keeper. Being fit to use ripe or green, every specimen can be gathered, all loss thus obviated. Very early, enormously productive, of medium size and the best possible quality, we fully believe that this new variety is destined to become a standard among squashes both for home use and market purposes. If you are growing a variety of squash that is unsatisfactory, try this. Pkt. 5c.; oz. 15c.

THE FAXON SQUASH

SQUASH.

COLUMBIAN SQUASH.

COLUMBIAN SQUASH.

This is a very beautiful variety. The vine bears a number of finely spotted leaves and very large yellow flowers. The fruits are round, flattened, pure white and handsomely striped with green. The flesh is very white and of fine flavor. It is very productive, outyielding other larger varieties. Pkt. 5c.

LIVINGSTON'S NEW PIE SQUASH.

This new squash has already become a favorite with market men. It is exceedingly uniform in size and shape, and just the size for retailing. It has been kept in one family for many years, and is preferred by them to any other for pies. The skin is russet and of a dark orange color, making the appearance very attractive. The flesh is very thick, making them so heavy that they appear to be perfectly solid. It is sweet, very fine grained, and is unexcelled for making pies. Pkt. 5c.; oz. 12c.; $\frac{1}{4}$ lb. 35c.

EARLY BUSH.

Early White Bush. A highly esteemed early variety, grown almost exclusively for first crop. From the hard texture of the rind it is well suited for shipping; very productive and valuable alike for market and family purposes. Pkt. 3c., oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 40c.

Summer Crookneck. Of dwarf, bushy habit and extremely productive. Flesh is greenish yellow, dry and of the most agreeable flavor, so much so that it is the most highly esteemed of all the summer varieties. Pkt. 3c., oz. 5c., $\frac{1}{4}$ lb. 15c.

Perfect Gem. This variety is equally desirable either as a summer or winter squash; wonderfully productive; flesh fine grained and cooks dry and sweet; rich, delicious flavor. Pkt. 3c., oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 50c.

Essex Hybrid. Very productive and of the finest quality; it is a wonderful keeper, specimens having been kept until June. It is one of the finest grained and sweetest of all squashes. Pkt. 3c., oz. 6c., $\frac{1}{4}$ lb. 20c., lb. 60c.

PERFECT GEM.

Hubbard. One of the standard winter squashes, and is one of the best for table use; a good keeper and very productive. Pkt. 4c., oz. 6c., $\frac{1}{4}$ lb. 18c., lb. 60c.

HUBBARD.

Sibley. This is unexcelled in quality, being superior to any other variety in richness, sweetness, dryness and delicate flavor. A good keeper. Pkt. 4c., oz. 6c., $\frac{1}{4}$ lb. 18c., lb. 60c.

Marblehead. This is an excellent variety and a fine keeper. Very fine grained, possessing a sweet and delicious flavor.

Pkt. 4c., oz. 6c., $\frac{1}{4}$ lb. 18c., lb. 60c.

Mammoth Chili. This is the largest of all squashes, has very thick flesh and is unsurpassed for stock feeding. Pkt. 4c., oz. 8c., $\frac{1}{4}$ lb. 25c., lb. 80c.

Address all orders to A. C. ANDERSON,

Leigh, Colfax Co., Nebraska.

EVERBEARING TOMATO.

Royal Red. This is a first class main crop variety for the shipper, private gardener. The color is a beautiful red, without the least tinge of purple. As to size and quality it is all that can be asked. Pkt. 3c., oz. 15c., $\frac{1}{4}$ lb. 50c.

The Stone. A fine new variety; large smooth and very solid; flesh firm, free from core; of rich scarlet color; excellent for market and home purposes. It is an extra fine variety. Pkt. 4c., oz. 15c., $\frac{1}{4}$ lb. 50c.

Livingston's Beauty. Few tomatoes can equal this desirable variety. It is very handsome, medium size and perfectly smooth. Good for all purposes. Pkt 3c, oz. 12c, $\frac{1}{4}$ lb. 40c.

Dwarf Champion. This is a dwarf, distinct variety with stiff stems that holds the foliage and fruit up from the ground. It is the earliest of all, ripe fruits having been picked the first of July. It bears fine fruits of medium size, very smooth and symmetrical. The best variety for family use. Pkt. 3c., oz. 15c., $\frac{1}{4}$ lb. 50c.

Perfection. One of the earliest, produces solid fruits of medium size, uniform and smooth. Much used for canning; of handsome blood-red color. Pkt. 3c., oz. 12c. $\frac{1}{4}$ lb. 40c.

New Peach. Striking and peculiar; resembles some peaches; the color is deep rose blended with orange amber. Very productive and of delicate flavor. Pkt. 3c., oz. 15c., $\frac{1}{4}$ lb. 50c.

Golden Queen. This is a beautiful yellow variety of superior quality. It is solid, smooth, large in size, ripens early, and a very handsome variety. Pkt. 3c., oz. 15c., $\frac{1}{4}$ lb. 50c.

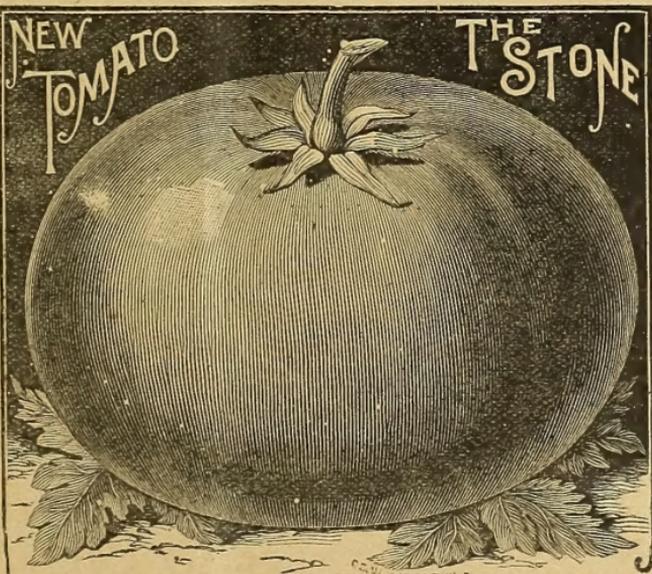

TOBACCO.

Connecticut Seed-Leaf. A hardy variety, does well in the North. Pkt. 4c., oz. 20c.

ANDERSON'S SEEDS WILL GROW.

Everbearing. This tomato ripens its fruit very early in the season, and will continue to bear and ripen fruits until cut down by frost. It is wonderfully productive, the plants being just loaded with beautiful tomatoes. Very firm and of pleasant flavor. Pkt. 7c.

Brinton's Best. Among 72 varieties of tomatoes growing side by side, this new variety was decided to be the best. It is large and uniform in size, perfectly smooth, and of a deep red color. Ripens medium early and is a good keeper. In quality it is unsurpassed and is sure to be appreciated. It is a variety that will please. Pkt. 3c., oz. 15c., $\frac{1}{4}$ lb. 50c.

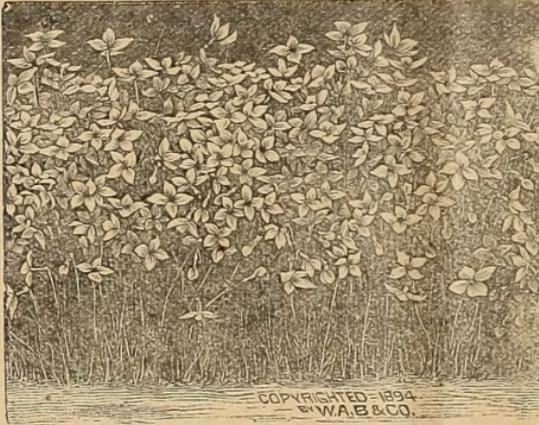

Extra Early Purple Top Munich. One of the earliest, and the finest for table use. Of a very fine quality; quick growing. Pkt. 3c., oz. 6c., $\frac{1}{4}$ lb. 15c., lb. 50c.

Large White Globe. A standard variety for family use, market and stock. Great yielder, and of excellent quality. Pkt. 3c., oz. 6c., $\frac{1}{4}$ lb. 15c., lb. 40c.

Mammoth Purple Top. An excellent large variety; very productive, yielding enormous crops. One of the best for stock feeding. Pkt. 3c., oz. 6c., $\frac{1}{4}$ lb. 15c., lb. 40c.

Improved Purple Top Yellow Ruta Baga. Fine large variety; an enormous yielder. It is one of the best for all purposes. Pkt. 3c., oz. 6c., $\frac{1}{4}$ lb. 15c., lb. 40c.

White Sweet Ruta Baga. A standard white variety, admirable for table use and desirable for feeding stock. An excellent keeper. Pkt. 3c., oz. 6c., $\frac{1}{4}$ lb. 15c., lb. 40c.

HOUSTONIA COERULEA.

This is a lovely little gem of great beauty and neatness. It commences to bloom early in the spring and continues to the middle of June. It has lovely bell-shaped light blue or pale lilac flowers, with yellow centers. It is perfectly hardy, thriving everywhere. 10c.

THE COLUMBIAN RASPBERRY.

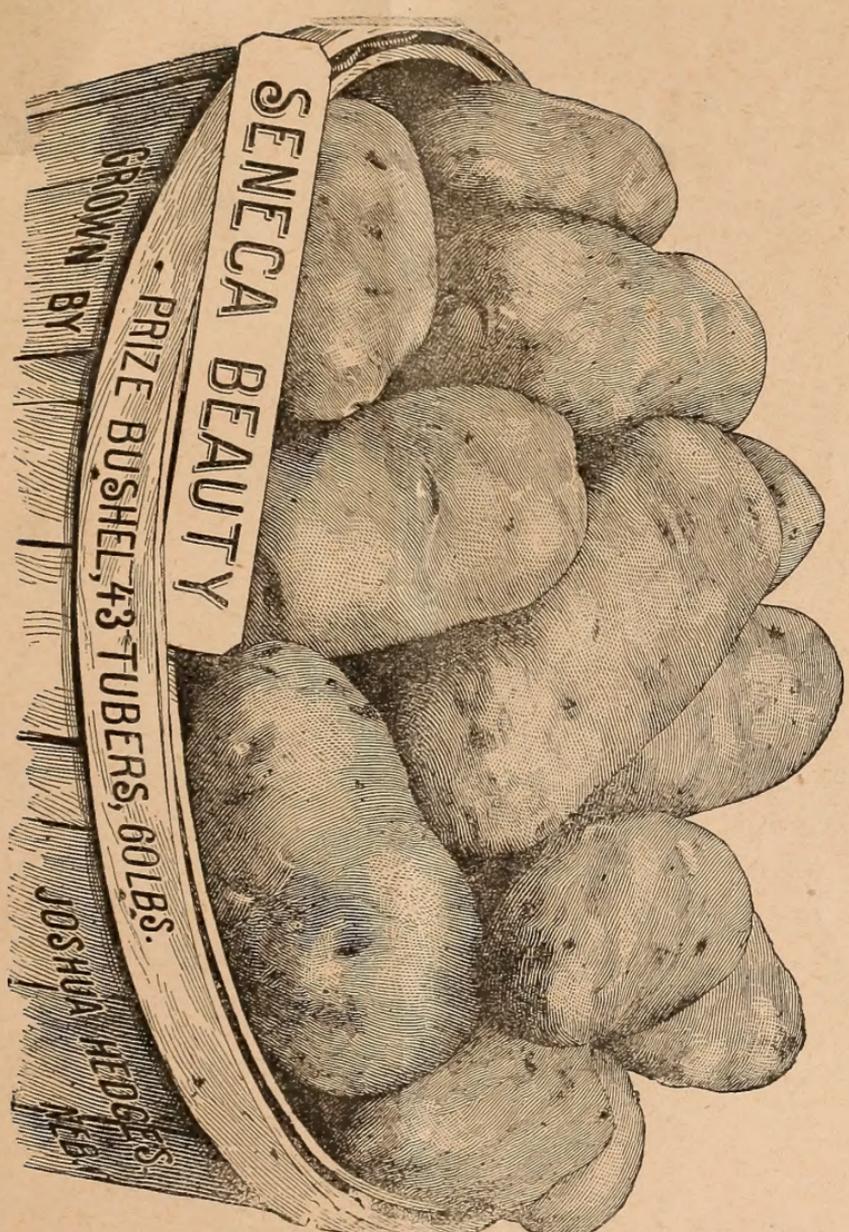

This is a most vigorous grower, producing canes ten to sixteen feet in length, and often over an inch in diameter; strong and woody; color light green, changing to bright red in autumn. Its foliage is very handsome and healthful. The roots are large and spreading and penetrate the soil to a great depth, thus enabling it to resist drought successfully. It is very hardy, enduring 28 degrees below zero without harm. Fruit very large, often an inch in diameter; shape somewhat conical; color dark red bordering on purple, adheres firmly to the stem and will dry on the bush if not picked; seeds small and deeply embedded in a rich juicy pulp, with a distinct flavor of its own, making it a most delicious table berry. It is wonderfully productive, yielding over 8,000 quarts per acre.

Strong plants 50c. each.

\$5.00 per dozen.

\$30.00 per hundred.

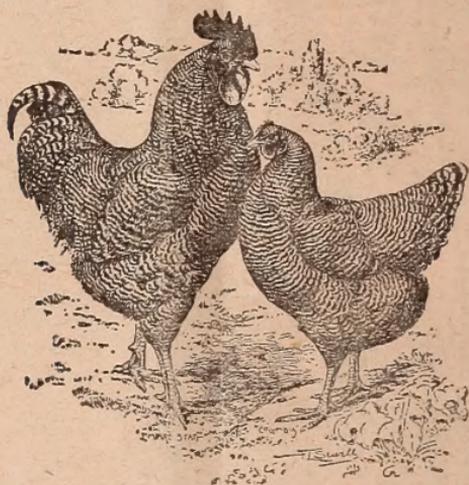

SENECA BEAUTY POTATO.

This valuable and distinct medium early variety is a special favorite with all who have grown it. Its appearance will sell it in any market. The tubers are large and very smooth, with eyes close to the surface; of a beautiful pink color. For five years it has never shown the least sign of blight, and last season produced twice as many marketable potatoes as the best varieties planted alongside. A good keeper and its quality is unsurpassed. It is surprisingly productive, yielding a large number of marketable potatoes, with scarcely any small ones. 10 eyes 10c., 25 eyes 20c., 75 eyes 50c.; 1 pound 18c., 2 pounds 30c. by mail. Peck 60c., bus. \$2.00, bbl. \$5.00 by freight or express.

LEIGH POULTRY YARDS.

H. M. WALKER, Proprietor.

BARRED PLYMOUTH ROCKS. (ESSEX STRAIN.)

Of these I have three very fine breeding yards, scientifically mated for best results—blue barred and fine under color. My birds have won both for me and in the hands of my customers in the best shows of the west. The Barred Plymouth Rocks are the best all-purpose fowl on earth, and need but little recommendation to fancier or farmer.

GOLDEN WYANDOTTES.

I also breed Golden Wyandottes, prize winners of the Brey and Theim strain, whose birds are known for their 18 karat gold centers and fine sebright lacing.

ROSE COMB BROWN LEGHORNS.

I have the Forsyth strain which produces the best layers on earth, and has won more prizes than all others in the strongest competition, such as Madison Square and other large shows.

My birds are all first class, try them and be convinced. Write for illustrated catalogue, enclosing stamp.

Address H. M. WALKER,

LEIGH, NEBRASKA.
